STEMUP

These questions belong to AQA, not to us.

The examination questions, mark schemes and examiner reports in this pack were written and published by AQA. They are past assessment materials, reproduced here so that students can revise from them.

What we do not own

STEMUP is not affiliated with AQA and does not own, and makes no claim to own, any of the question, mark scheme or examiner report material in this pack. AQA has not endorsed, approved or been involved in the production of it. AQA and the qualification titles used here belong to their respective owners and appear for identification only.

Where to find the originals

AQA publishes its past papers, mark schemes and examiner reports free of charge. Always check the current specification at aqa.org.uk before you revise, because content and wording can change between series.

If you hold the rights to any material in this pack and would like it amended or removed, contact admin@stemup.co.uk and we will act on it.

2. **Explanation**

For defining investment, for example, that which is spent on capital equipment which can be used to create output and / or improve efficiency.
Investment and its linkage with aggregate demand
Investment as an injection into the circular flow
Investment and human capital
Overseas investment, such as FDI, portfolio investment or investment by multinational companies.
Examples of investment.
Use of technical terms, e.g. gross / net investment; private / social capital; physical / financial capital.
For use of a relevant diagram, e.g. circular flow

Analysis of benefit

Overseas investment spearheading trade links boosting the export sector. Overseas investment can spearhead trade links thus helping to boost the UK export sector. This in turn can be the growth inducing factor for the economy, especially by generating an export multiplier leading to an economic stimulus of the sector.
Stronger international linkages benefiting the balance of payments on current account.
The potential benefits to domestic employment.
Profit, interest, dividends (PID) from overseas investment and uses to which these might be put.
Any other valid analysis.
Use of appropriate diagrams, e.g. AD / AS.
References to the UK economy in the analysis.

STEMUP.CO.UK

3.

Relevant issues include:

- definitions/explanations: output, output gap, positive output gap, economic cycle
- linking positive output gaps to booms
- reasons which may have caused an economy to end up in a positive output gap
- linking positive output gaps to real output growing faster than productive potential
- if the output gap is persistent it will eventually lead the economy to overheat
- explaining the problems which may be caused by positive output gaps such as:
  - demand-pull inflation as too much money is chasing too few goods
  - cost-push inflation due to labour shortages
  - wage-price spirals
  - rising imports as consumption is rising and possible leakages rise
  - falling exports if inflationary pressure occurs
  - an increase in the current account deficit
  - unsustainable asset price rises
  - potential effects on the exchange rate
- linking the ‘problems’ of the economy having a large positive output gap to the causes such as low productivity growth.

The use of relevant diagrams to support the analysis should be taken into account when assessing the quality of the student’s response to the question.

Level of response	Response	Max 15 marks
3	**A good response provides an answer that:** • is well organised and develops a selection of the key issues that are relevant to the question • shows sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors • includes good application of relevant economic principles to the given context and, where appropriate, good use of data to support the response • includes well-focused analysis with clear, logical chains of reasoning.	**11–15 marks**
2	**A reasonable response provides an answer that:** • focuses on issues that are relevant to the question • shows satisfactory knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present • includes reasonable application of relevant economic principles to the given context and, where appropriate, some use of data to support the response • includes some reasonable analysis but which might not be adequately developed or becomes confused in places.	**6–10 marks**
1	**A weak response provides an answer that:** • has identified one or more relevant issues • has some limited knowledge and understanding of economic terminology, concepts and principles but some errors are likely • has very limited application of relevant economic principles to the given context and/or data to the question • might have some limited analysis but it may lack focus and/or become confused.	**1–5 marks**

[15]

5.

Explanation:

For a relevant explanation of circular flow: eg A model which demonstrates the flow of money between households and firms and going on to explain the role of injections/leakages or linking the circular flow to measures of national income/output /expenditure.
For a diagram of the circular flow

STEMUP.CO.UK

Analysis:

For Example: Increased growth in the US could lead to rising disposable income of US citizens who may increase their spending this may be on UK's goods or services which would lead to increased export earnings for the UK which would increase the output of UK firms and therefore AD of which exports are a component which therefore increases the national income of the UK.
Use of appropriate diagrams, eg a diagram showing increased AD on an AD/AS diagram or increased FDI from overseas increasing both AD and AS
Reference to the UK or other economies.

8.

Level of response	Response	Max 25 marks
5	**Sound, focused analysis and well-supported evaluation that:** • is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors • includes good application of relevant economic principles and, where appropriate, good use of data to support the response • includes well-focused analysis with clear, logical chains of reasoning • includes supported evaluation throughout the response and in a final conclusion.	**21-25 marks**
4	**Sound, focused analysis and some supported evaluation that:** • is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors • includes good application of relevant economic principles and, where appropriate, some good use of data to support the response • includes some well-focused analysis with clear, logical chains of reasoning • includes some reasonable, supported evaluation.	**16-20 marks**
3	**Some reasonable analysis but generally unsupported evaluation that:** • focuses on issues that are relevant to the question, showing satisfactory knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present • includes reasonable application of relevant economic principles and, where appropriate, some use of data to support the response • includes some reasonable analysis but which might not be adequately developed or becomes confused in places • includes fairly superficial evaluation; there is likely to be some attempt to make relevant judgements but these aren't well-supported by arguments and/or data.	**11-15 marks**

STEMUP.CO.UK

2	**A fairly weak response with some understanding that:** • includes some limited knowledge and understanding of economic terminology, concepts and principles but some errors are likely • includes some limited application of relevant economic principles and/or data to the question • includes some limited analysis but it may lack focus and/or become confused • includes some evaluation which is weak and unsupported.	**6-10 marks**
1	**A very weak response that:** • includes little relevant knowledge and understanding of economic terminology, concepts and principles • includes analysis which is, at best, very weak • includes attempted evaluation which is weak and unsupported.	**1-5 marks**

Relevant issues and areas for discussion include:

- the stability of the Brazilian economy
- political and social stability
- the rule of law and corruption
- whether the investment is likely to be profitable and whether it is secure
- the nature of any capital controls
- the infrastructure in Brazil
- the skills and abilities of the workforce
- financial and other support from the government
- regulations on business
- the tax regime; both corporate and individual taxes
- availability of finance
- the prospects for future growth of the Brazilian economy
- the size of the Brazilian car market and the potential for future growth
- access and proximity to businesses that can support the car industry, eg component suppliers
- potential for exporting cars from Brazil, eg access to other markets in the Americas
- the prospects for the value of the Brazilian currency, the real, and its stability

[25]

9. A

[1]

10. B

[1]

STEMUP.CO.UK

11. **Areas for discussion include:**

- definitions/explanations: policies, trade surplus, economic growth
- explaining the trade surplus in terms of the value of exports and imports
- explaining how a trade surplus could add to aggregate demand (AD)
- linking net trade to injections to the circular flow
- linking net trade to the multiplier effect
- explaining policies which may be used to boost a trade surplus such as:
    - supply-side policies (R+D, education, infrastructure)
    - exchange rate manipulation
    - protectionism
    - expenditure-reducing policies (although this isn't really the emphasis of the context)
    - ending the trade war with Japan
- explaining the drawbacks of each method and limitations such as:
    - supply-side policies (time lags/expense)
    - exchange rate manipulation (misallocating resources)
    - protectionism (retaliation)
    - expenditure-reducing policies (damaging other macroeconomic objectives)
- explaining the effects of external shocks on trade
- explaining how global shocks, such as a pandemic, may lead to unavoidable disruption of trade
- considering the effects of a trade surplus on output, employment and investment
- considering the capital and financial accounts and their potential impacts on the economy
- considering how long-run economic growth can be created by a trade surplus
- considering possible trade-offs with other macroeconomic goals
- considering the possible effects on exchange rates in the long run
- considering the extent to which South Korea can manipulate its trade outcomes in a globalised world.

The use of relevant diagrams to support the analysis should be taken into account when assessing the quality of the student's response to the question.

Level of response	Response	Max 25 marks
5	**Sound, focused analysis and well-supported evaluation that:** • is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors • includes good application of relevant economic principles to the given context and, where appropriate, good use of data to support the response • includes well-focused analysis with clear, logical chains of reasoning • includes supported evaluation throughout the response and in a final conclusion.	**21 – 25 marks**
4	**Sound, focused analysis and some supported evaluation that:** • is well organised, showing sound knowledge and understanding of economic terminology, concepts and principles with few, if any, errors • includes some good application of relevant economic principles to the given context and, where appropriate, some good use of data to support the response • includes some well-focused analysis with clear, logical chains of reasoning • includes some reasonable, supported evaluation.	**16 – 20 marks**
3	**Some reasonable analysis but generally unsupported evaluation that:** • focuses on issues that are relevant to the question, showing satisfactory knowledge and understanding of economic terminology, concepts and principles but some weaknesses may be present • includes reasonable application of relevant economic principles to the given context and, where appropriate, some use of data to support the response • includes some reasonable analysis but which might not be adequately developed or becomes confused in places • includes fairly superficial evaluation; there is likely to be some attempt to make relevant judgements but these aren't well-supported by argumentsand/or data.	**11 – 15 marks**
2	**A fairly weak response with some understanding that:** • includes some limited knowledge and understanding of economic terminology, concepts and principles but some errors are likely • includes some limited application of relevant economic principles to the given context and/or data to the question • includes some limited analysis but it may lack focus and/or become confused • includes some evaluation which is weak and unsupported.	**6 – 10 marks**
1	**A very weak response that:** • includes little relevant knowledge and understanding of economic terminology, concepts and principles • includes application to the given context which is, at best, very weak • includes attempted analysis which is weak and unsupported.	**1 – 5 marks**
