STEMUP

These questions belong to AQA, not to us.

The examination questions, mark schemes and examiner reports in this pack were written and published by AQA. They are past assessment materials, reproduced here so that students can revise from them.

What we do not own

STEMUP is not affiliated with AQA and does not own, and makes no claim to own, any of the question, mark scheme or examiner report material in this pack. AQA has not endorsed, approved or been involved in the production of it. AQA and the qualification titles used here belong to their respective owners and appear for identification only.

Where to find the originals

AQA publishes its past papers, mark schemes and examiner reports free of charge. Always check the current specification at aqa.org.uk before you revise, because content and wording can change between series.

If you hold the rights to any material in this pack and would like it amended or removed, contact admin@stemup.co.uk and we will act on it.

Q1.

Discuss what Baillargeon's research has told us about early infant abilities.

(Total 16 marks)

Q2.

Baillargeon studied early infant abilities by conducting violation of expectation studies.
What is meant by 'violation of expectation'?

(Total 1 mark)

Q3.

(a) Describe **one** way in which psychologists have investigated the cognitive abilities of infants under the age of two years. Refer to a specific study in your answer.

(3)

(b) Evaluate the way of investigating infant cognitive abilities that you have described in your answer to part (a). Do **not** refer to ethical issues in your answer.

(3)

(Total 6 marks)
