ECONOMICS **9708/31**

Paper 3 A Level Multiple Choice **October/November 2025**

1 hour 15 minutes

You must answer on the multiple choice answer sheet.

0660658001

You will need: Multiple choice answer sheet
Soft clean eraser
Soft pencil (type B or HB is recommended)

INSTRUCTIONS

- There are **thirty** questions on this paper. Answer **all** questions.
- For each question there are four possible answers **A**, **B**, **C** and **D**. Choose the **one** you consider correct and record your choice in soft pencil on the multiple choice answer sheet.
- Follow the instructions on the multiple choice answer sheet.
- Write in soft pencil.
- Write your name, centre number and candidate number on the multiple choice answer sheet in the spaces provided unless this has been done for you.
- Do **not** use correction fluid.
- Do **not** write on any bar codes.
- You may use a calculator.

INFORMATION

- The total mark for this paper is 30.
- Each correct answer will score one mark.
- Any rough working should be done on this question paper.

This document has **12** pages.

© UCLES 2025

[Turn over

1 What is likely to lead to the principal-agent problem?

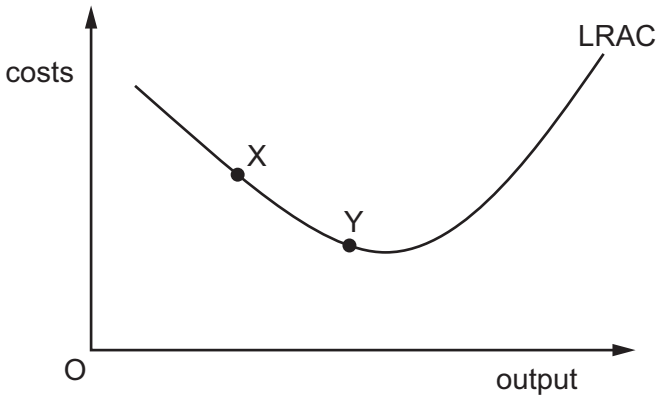

A a manager of a business makes decisions on behalf of the owner

B music festival tickets are purchased by a person who intends to sell them at a large profit

C the government is the only buyer of a pharmaceutical product

D there is only one firm that manufactures the product

2 A small European airline currently produces at point X on its long-run average cost curve (LRAC). It wants a bigger share of the European airline market and proposes to merge with another small European airline. The newly merged firm would produce at point Y on the long-run average cost curve, as shown.

Why might the newly merged firm be able to produce at point Y?

A The new airline can negotiate discounts when buying fuel.

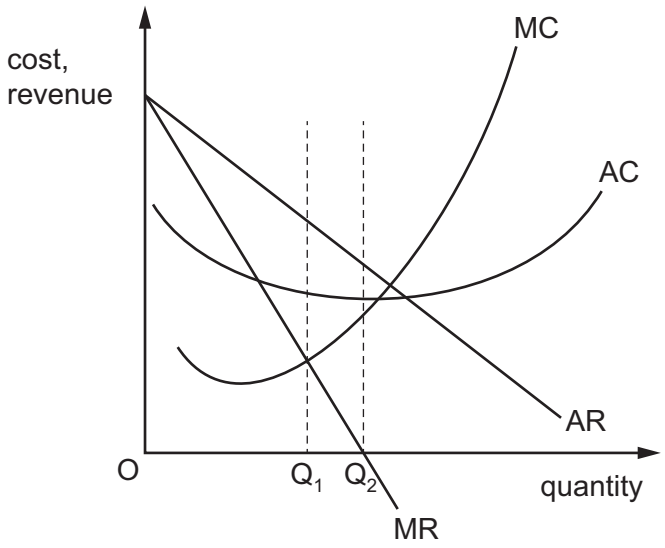

B The new airline has many layers of management.

C The new airline is unable to hire enough pilots.

D The workforce of the new airline lacks morale and is demotivated.

© UCLES 2025

3 The diagram shows that a producer increases output from Q_1 to Q_2.

What will be the result?

	total profit	total revenue
A	increased	increased
B	increased	reduced
C	reduced	increased
D	reduced	reduced

4 A consumer maximises his total utility by initially buying 10 units of good X and 10 units of good Y.

Assuming both goods are normal, what would cause this utility-maximising consumer to purchase more of good Y and less of good X?

A an increase in the marginal utility of good Y

B an increase in the price of good Y

C an increase in the tax on the consumption of good Y

D an increase in the tax on the income of consumers

5 What is most likely to lead to a Pareto-optimal outcome?

A offering bulk-buy discounts to customers who join a loyalty scheme

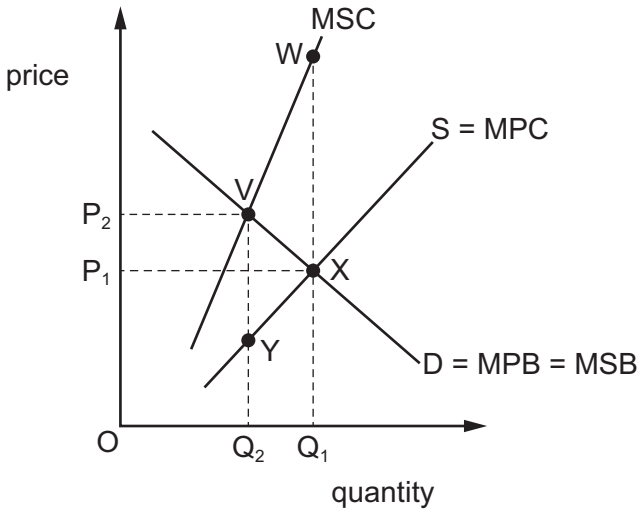

B switching labour from producing low-priced products to producing high-priced products

C switching production from labour-intensive products to capital-intensive products

D training low-skilled workers to operate machinery effectively

© UCLES 2025

6 The diagram shows market failure caused by negative production externalities.

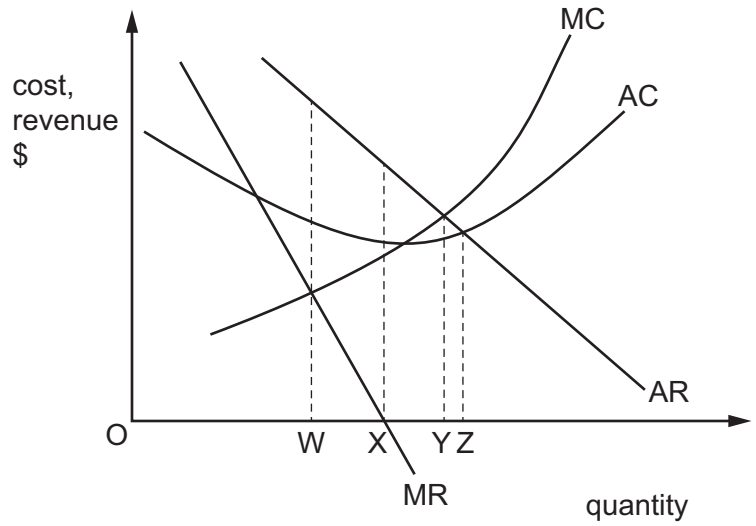

Identify the correct combination of the result of the market failure and the area on the diagram that shows deadweight welfare loss.

	result of market failure	area showing deadweight welfare loss
A	overproduction	VWX
B	overproduction	XYV
C	underproduction	VWX
D	underproduction	XYV

© UCLES 2025

7 The diagram shows the cost and revenue curves of a firm.

The firm changes its objective from revenue maximisation to sales maximisation.

What will be the effect on quantity produced?

A it will decrease from Y to W

B it will decrease from Z to W

C it will increase from X to Y

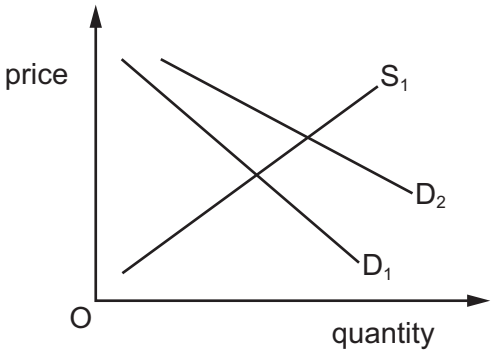

D it will increase from X to Z

© UCLES 2025

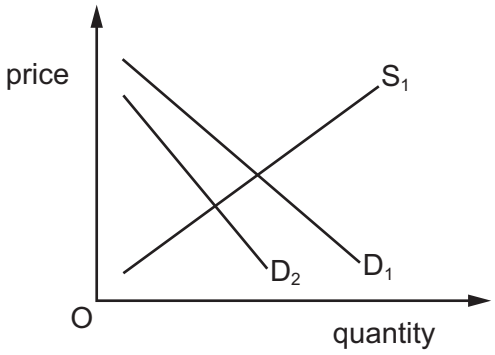

8 The diagrams show the demand curve, D_1, and the supply curve, S_1, for a good that has a sales tax of 10% applied to the final selling price.

Which diagram shows the impact of a reduction in the rate of sales tax to 5%?

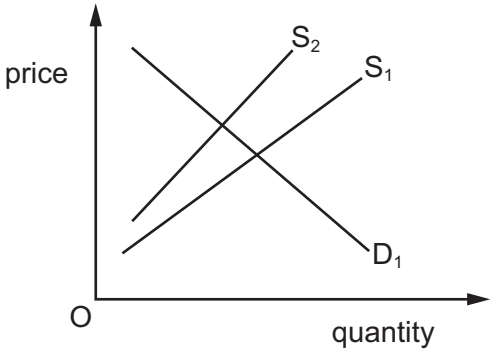

A

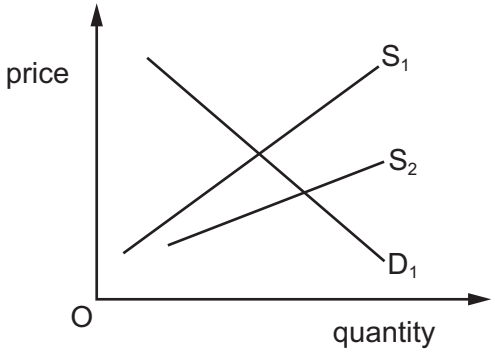

B

C

D

9 Which government policy is intended to correct a negative externality?

A guaranteed minimum prices for farmers producing certain agricultural products

B imposition of taxes on factories releasing pollutants into rivers

C rent controls on housing occupied by low-income individuals

D the provision of free books for children of poorer households

10 Which policy is most likely to contribute to people ending up in a poverty trap?

A legal minimum wage

B means-tested benefits

C prevention of cheaper imports

D proportional taxation

© UCLES 2025

11 Extra fishing boats start to operate from a local harbour which depends on fishing for its main income.

Which action by the local authority is an example of nudge theory?

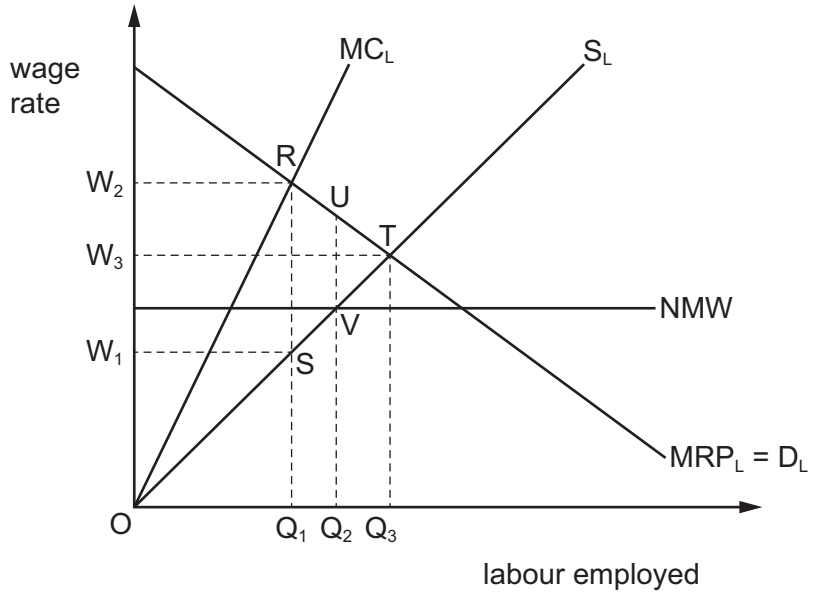

A insisting that all fish caught are sold to local people

B increasing the licence fees for new boats

C distributing leaflets about the need to safeguard fish stocks

D restricting the areas in which boats can fish

12 The diagram shows the effect of introducing an effective national minimum wage (NMW) in a labour market with a profit maximising monopsonist employer.

What is the effect of the NMW on the deadweight welfare loss in this market?

A It falls from RST to UVT.

B It falls from RSVU to UVT.

C It rises from UVT to RST.

D It rises from UVT to RSVU.

13 What is an advantage of pollution permits, when compared with an alternative policy of taxes levied on the quantity of pollutants emitted by firms?

A firms cannot sell any surplus permits

B no monitoring of firms' emissions is required

C pollution levels can be reduced to zero

D the reduction in the level of pollution is more predictable

© UCLES 2025

14 Which statement about the quantity theory of money is correct?

A It suggests changes in liquidity preference lead to proportional changes in the price level.

B It suggests changes in the money supply lead to proportional changes in the price level.

C It suggests changes in the price level lead to proportional changes in liquidity preference.

D It suggests changes in the price level lead to proportional changes in the money supply.

15 What is a part of Keynesian economic analysis?

A a liquidity trap below which interest rates are ineffective

B an equilibrium price that always clears the market

C a small value for the government expenditure multiplier

D a vertical short-run aggregate supply curve

16 What describes a Keynesian measure to reduce cyclical unemployment?

A adopting a supply-side policy to retrain unskilled workers

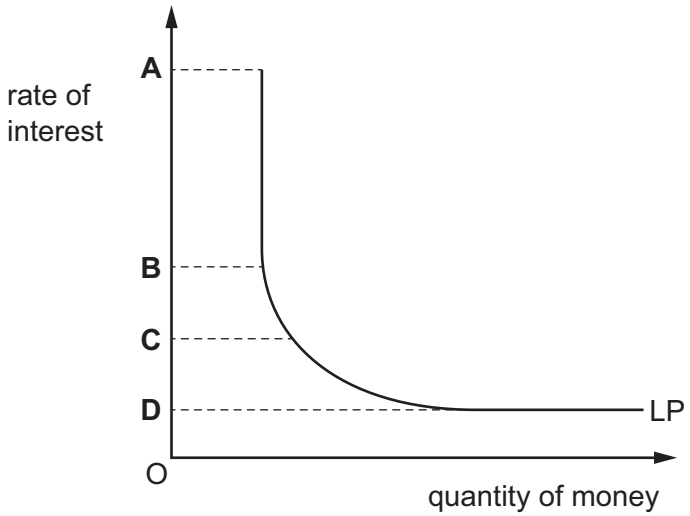

B allowing the private sector to take over the supply of merit goods

C increasing the ratio of capital equipment to manual labour in production

D using fiscal policy to increase effective demand

17 The diagram shows liquidity preference (LP).

At which rate of interest does the liquidity trap occur?

18 What is a likely consequence of an increase in government spending on education?

A increase in the supply of unskilled labour

B increase in occupational mobility

C increase in the rate of unemployment

D increase in trade union power

19 A country's trade balance has worsened. The country has a fixed exchange rate.

Which additional changes for unemployment and price level are likely to follow?

	the level of unemployment	the price level
A	decreases	decreases
B	decreases	increases
C	increases	decreases
D	increases	increases

20 What may prevent a government achieving a faster rate of growth of real GDP?

A The multiplier has a small value.

B The consumer price index is below its target set by the central bank.

C The economy is operating on the vertical section of the long-run aggregate supply curve.

D There is a large negative output gap in the economy.

21 A fall in domestic investment leads to an increase in unemployment.

Which other economic problem is likely to occur as a result?

A an increase in interest rates on loans for house purchases

B an increase in the current account balance of payments deficit

C an increase in the government budget deficit

D an increase in the rate of price inflation

© UCLES 2025

[Turn over

22 To overcome deflation in an economy the government increases the size of its budget deficit and funds this by increasing the money supply.

What is most likely to reduce the effectiveness of these measures?

A a high marginal propensity to save

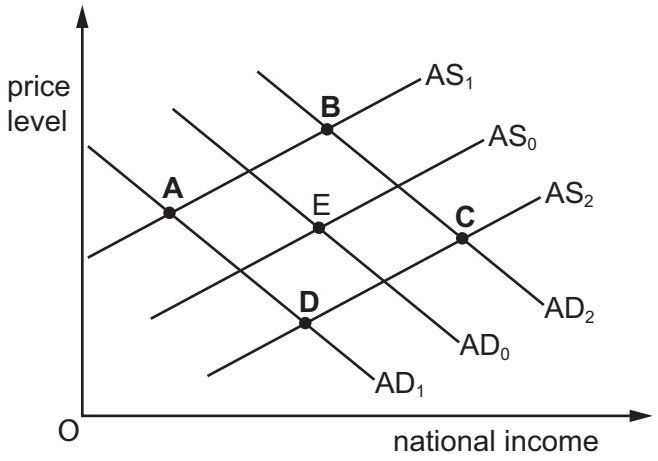

B a rise in business confidence

C an inelastic demand for money

D low cash deposit ratios for commercial banks

23 The diagram shows the aggregate demand, AD, and aggregate supply, AS, curves for an economy. The initial equilibrium is at point E. There is a revaluation of the exchange rate.

If the Marshall-Lerner rule applies, which point on the diagram would show the new long-run equilibrium?

24 What does the Kuznets curve show about the relationship between economic development and inequality?

A the Gini coefficient initially falls as countries develop from low to high income levels

B the Gini coefficient initially rises as countries develop from low to high income levels

C there is always a negative relationship between GDP per capita and the Gini coefficient

D there is always a positive relationship between GDP per capita and the Gini coefficient

© UCLES 2025

25 Which statement about the components of the balance of payments is correct?

A The current account consists of transactions in goods, services, investment income and remittances between countries.

B The current account consists of transactions in goods, services, and portfolio investment between countries.

C The financial account consists of transactions in financial assets, investment income and remittances between countries.

D The financial account consists of transactions in fixed assets, investment income and the balancing item between countries.

26 Which statement describes a multinational company (MNC)?

A A firm that avoids paying indirect taxes.

B A firm that conducts operations in different countries.

C A firm that experiences diseconomies of scale at low levels of output.

D A firm that trades internationally.

27 What occurs in a monetary union?

A Countries have the same currency.

B Countries use the same fiscal policy.

C Countries have the same domestic rates of sales tax.

D The government budget in each country is balanced.

28 What is the main role of the World Bank?

A to ensure that exchange rate systems are working efficiently

B to help countries enter international markets where trade barriers exist

C to offer short-term assistance to countries with balance of payments problems

D to provide low-interest loans to developing countries for infrastructure projects

© UCLES 2025

[Turn over

29 There is a rise in the domestic rate of interest in an economy. This economy has a fixed exchange rate.

What would be the impact on the current and financial accounts of the balance of payments?

	current account	financial account
A	improves	improves
B	improves	worsens
C	worsens	improves
D	worsens	worsens

30 As a member of the European Union, Greece must trade at the same exchange rate, tied to the euro, as stronger economies such as Germany. Greece has a persistent balance of payments deficit.

How would changing to a floating exchange rate help Greece?

A Exchange rates will be less volatile which encourages international investment.

B Its currency should be less open to attacks by international speculators.

C Its currency would be allowed to depreciate which will make its exports more competitive.

D The value of its exports and imports will automatically balance.

Paper 3 A Level Multiple Choice **October/November 2025**

1 hour 15 minutes

You must answer on the multiple choice answer sheet.

You will need: Multiple choice answer sheet
Soft clean eraser
Soft pencil (type B or HB is recommended)

INSTRUCTIONS

- There are **thirty** questions on this paper. Answer **all** questions.
- For each question there are four possible answers **A**, **B**, **C** and **D**. Choose the **one** you consider correct and record your choice in soft pencil on the multiple choice answer sheet.
- Follow the instructions on the multiple choice answer sheet.
- Write in soft pencil.
- Write your name, centre number and candidate number on the multiple choice answer sheet in the spaces provided unless this has been done for you.
- Do **not** use correction fluid.
- Do **not** write on any bar codes.
- You may use a calculator.

INFORMATION

- The total mark for this paper is 30.
- Each correct answer will score one mark.
- Any rough working should be done on this question paper.

This document has **12** pages. Any blank pages are indicated.

© UCLES 2025

1 What is the definition of moral hazard?

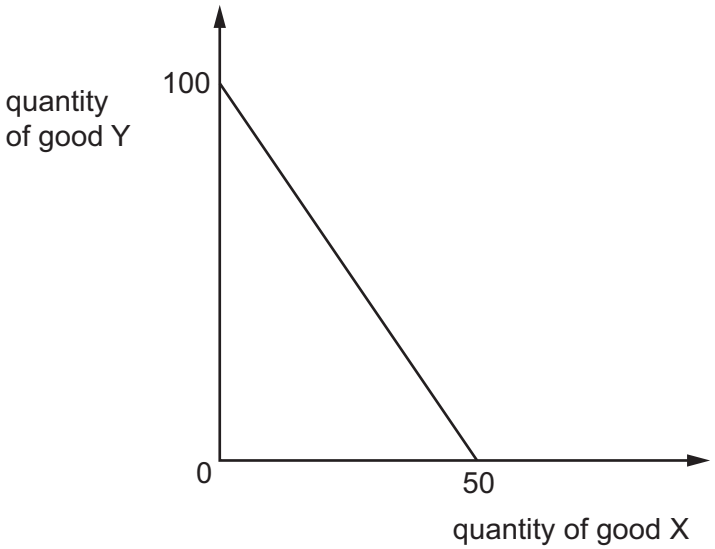

A An increase in the likelihood of taking risks because another party is paying for these risks.

B The loss of social welfare arising from the consumption of a good.

C When buyers and sellers have different amounts of information regarding product quality.

D When costs and benefits are taken into account when a decision is being made.

2 The diagram shows a consumer's budget line.

What determines the slope of the budget line?

A the marginal rate of substitution of good X for good Y

B the price of good X multiplied by the price of good Y

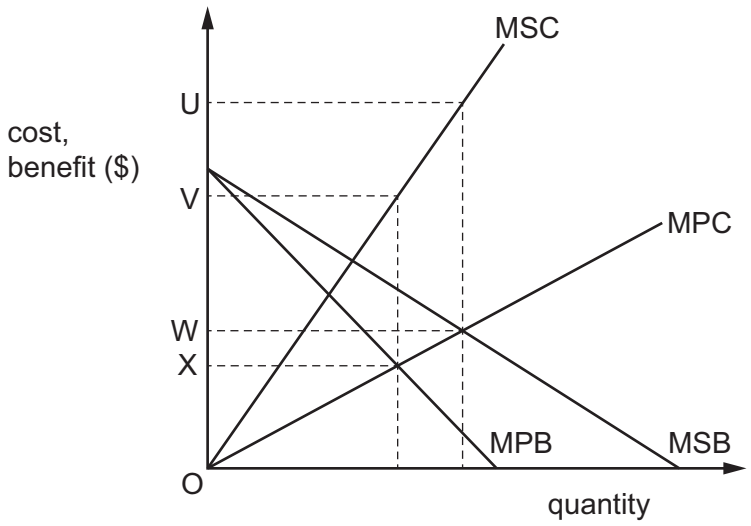

C the ratio of the price of good X to the income of the consumer

D the ratio of the price of good X to the price of good Y

© UCLES 2025

3 The diagram shows the marginal costs and marginal benefits of producing a good in a free market.

What is the marginal external cost when the free market is in equilibrium?

A UW **B** UO **C** VX **D** VO

4 A firm has very high fixed costs but low marginal costs of production. It experiences continuous economies of scale so that the minimum efficient scale is not reached until the firm is very large in relation to total market demand.

In which type of market structure would the firm operate?

A monopolistic competition

B monopsony

C natural monopoly

D oligopoly

© UCLES 2025

5 The table gives the marginal utility of two goods, X and Y. The price of good X is $2.00 and the price of good Y is $1.00.

quantity	marginal utility of good X	marginal utility of good Y
1	110	66
2	80	50
3	66	38
4	56	33
5	33	30

If a consumer spends all of their income on goods X and Y, which combination of goods would they choose to maximise their utility?

A 1 unit of X and 1 unit of Y

B 3 units of X and 1 unit of Y

C 3 units of X and 4 units of Y

D 5 units of X and 1 unit of Y

6 An economist undertakes a cost–benefit analysis of the pollution resulting from a manufacturing process.

Which outcome is most likely to guide any recommendation about the optimal level of manufacturing output?

A that the marginal social cost of manufacturing equals the marginal social benefit

B that the marginal cost of pollution is zero

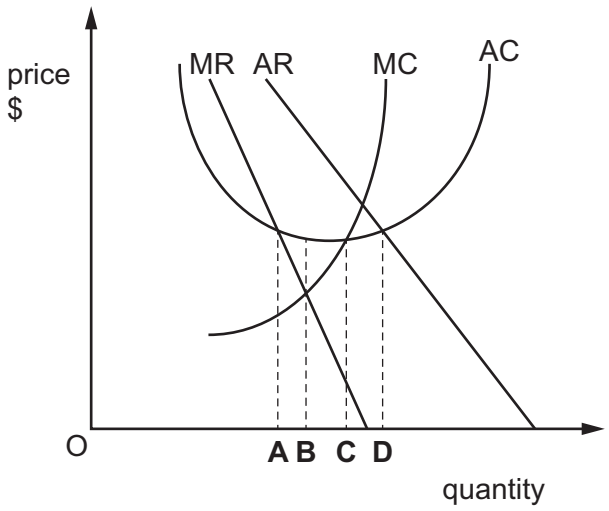

C that the total revenue of manufacturing equals the total cost

D that the total benefit of pollution is maximised

© UCLES 2025

7 The diagram shows the cost and revenue curves for a monopolist.

Which level of output represents sales maximisation?

8 What might help achieve allocative efficiency?

A differentiated products

B government subsidies

C monopsony

D supernormal profits

9 What is the essential feature of nudge theory?

A the aim of satisficing

B the establishing of a legal requirement

C the existence of a contestable market

D the idea of persuasion

10 A government has a policy where income tax is paid only after the first $20 000 of income has been earned.

What would make the government's policy more equitable?

A Decreasing the threshold for paying income tax to $10 000 for all taxpayers.

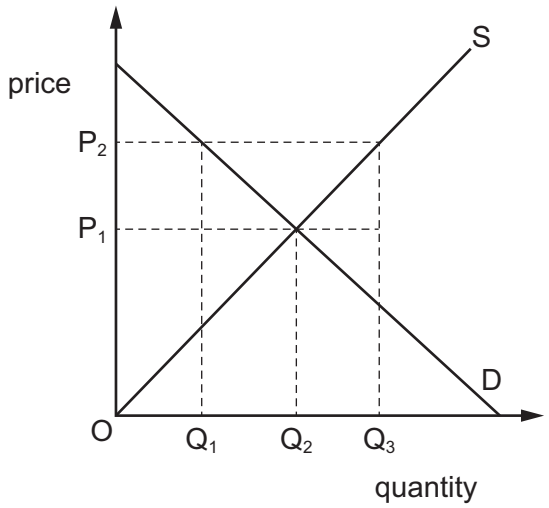

B Integrating the tax and welfare systems by introducing a negative income tax.

C Introducing universal benefits that are available to all citizens irrespective of wealth.

D Means testing all benefits so that they remain the same even if real incomes fall.

© UCLES 2025

11 A government introduces a maximum price for rice of P_2.

What is the effect of this?

A Government spending will increase.

B The price of rice will be unchanged.

C There will be a shortage of rice.

D There will be a surplus of rice.

12 A government intervenes to raise the wages of a group of workers to prevent their exploitation.

Where might such government intervention be justified?

A in an industry that is protected by tariffs on imports from abroad

B in an industry where a trade union negotiates wages for the workers

C in an industry where the output is produced by a single firm monopolist

D in an industry where workers are employed by a monopsonist

13 What is likely to reduce the domestic money supply?

A Banks being allowed to hold a lower liquidity ratio.

B Individuals choosing to hold more money in the form of idle balances.

C The government financing its budget deficit by borrowing from the banking sector.

D The government increasing its borrowing from other countries.

© UCLES 2025

14 The unemployment rate in an economy may continue to rise even after the economy has recovered from a recession.

Which explanation for this trend is **not** correct?

A Many foreign businesses have moved out of the country.

B The government has abolished the national minimum wage.

C An increase in net migration of low-skilled workers.

D Workers lose skills, making them less employable.

15 In which situation is expansionary fiscal policy **least** likely to be effective?

A inflation is below its target rate

B lack of confidence in the economy

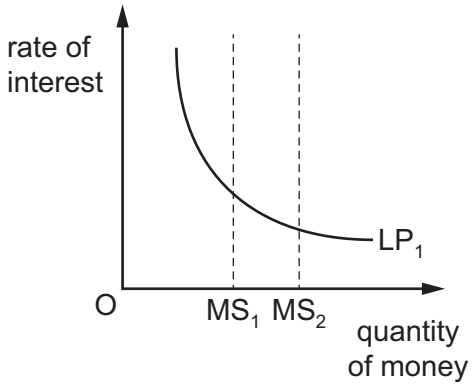

C there is a negative output gap

D unemployment is high

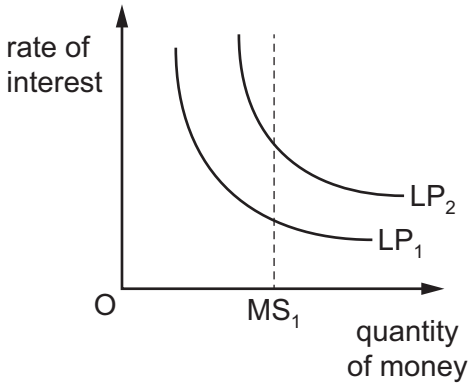

16 In these four diagrams, the money supply in an economy is initially at MS_1 and the demand for money is initially at LP_1.

Which diagram shows the effect of a policy of quantitative easing on the rate of interest?

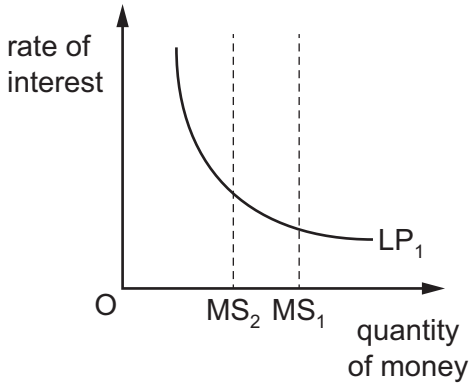

A

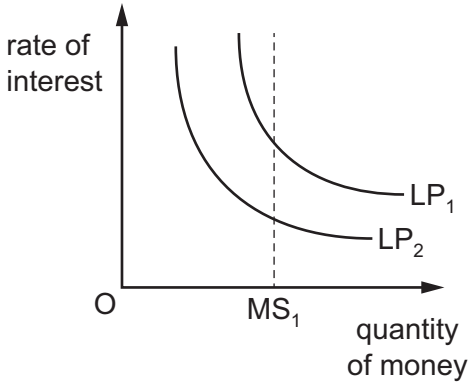

B

C

D

© UCLES 2025

[Turn over

17 What is most likely to increase if an economy enters a negative output gap?

A business confidence

B economic growth rate

C inflation rate

D unemployment rate

18 A country with a managed exchange rate has a persistent deficit on the current account of the balance of payments. It devalues its currency to reduce this deficit.

Under which conditions will a devaluation help the government to achieve its four main macroeconomic objectives?

	Marshall–Lerner condition satisfied	level of employment
A	no	below full employment
B	no	full employment
C	yes	below full employment
D	yes	full employment

19 What would cause an individual's demand curve for an active money balance to move to the left?

A an increase in the frequency of income payments

B an increase in the general price level

C an increase in the individual's income

D an increase in the rate of interest

20 A government funds an increase in transfer payments to the unemployed by increasing the higher rate of income tax.

What is the most likely impact of this change?

A government borrowing increases

B the incentive to work increases

C the marginal propensity to consume increases

D the quantity of imports increases

© UCLES 2025

21 Which combination shows the most likely outcome if a government increases the level of direct taxation?

A balance of payments deteriorates and inflation increases

B economic growth increases and balance of payments improves

C inflation decreases and unemployment increases

D unemployment decreases and balance of payments improves

22 In an economy, the price elasticity of demand for imported raw materials is 0.3, and the price elasticity of demand for exports is also 0.3.

Following a depreciation of the economy's currency, what will the impact on inflation be?

	change in inflation rate due to cost-push factors	change in inflation rate due to demand-pull factors
A	decrease	decrease
B	decrease	increase
C	increase	decrease
D	increase	increase

23 A government is aiming to reduce the unemployment rate in its country from 10% to 5%.

What is a likely effect if this aim is achieved?

A a decrease in interest rates

B a slow down in the rate of economic growth

C an increase in demand for exports

D an increase in inflation

24 Which statement is correct?

A Economic development is necessary for economic growth.

B Economic growth and economic development are directly proportional.

C Economic growth enables economic development.

D Economic growth is always sustainable.

© UCLES 2025

[Turn over

25 What is a trade-weighted exchange rate?

A the price of one currency against a basket of other currencies

B the price of one currency in terms of another

C the price of one currency in terms of its real purchasing power

D the price of one currency being determined by state intervention

26 The United Nations gives aid to a developing country so it can purchase vaccinations manufactured in India.

How is this aid characterised?

	characteristic 1	characteristic 2
A	bilateral	tied
B	bilateral	untied
C	multilateral	tied
D	multilateral	untied

27 What is a protectionist policy a government may use to reduce the deficit on the balance of payments of the current account?

A revaluation of the exchange rate

B increase in the rate of income tax

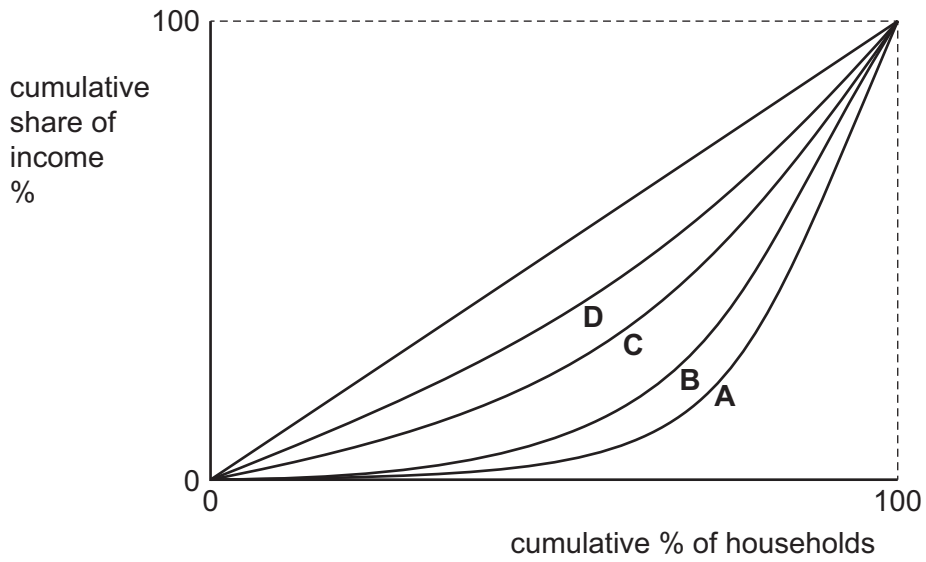

C increase in the rate of interest

D introduction of import quotas

© UCLES 2025

28 The diagram shows a Lorenz curve of the distribution of income of households for a country.

Which curve shows the most equal distribution of income of households?

29 An economy has a large surplus on the current account of its balance of payments. It revalues its currency. The current account of the balance of payments becomes a greater surplus in the short run. In the long run the surplus becomes smaller and eventually becomes a deficit.

What is the sum of the price elasticities of imports and exports in the short run and in the long run?

	short run	long run
A	greater than 1.0	greater than 1.0
B	greater than 1.0	less than 1.0
C	less than 1.0	greater than 1.0
D	less than 1.0	less than 1.0

30 What is **not** a characteristic of an emerging economy?

A an agricultural sector with a growing % of GDP

B high birth rates

C high potential for growth

D increasing access to education

© UCLES 2025

1 Why would an economy wish to achieve economic efficiency?

A to achieve an equal distribution of income

B to achieve full employment

C to ensure resources are not wasted

D to ensure international competitiveness

2 A firm has set a low price in the short run to act as a barrier to entry for new firms entering the market.

This is an example of which pricing strategy?

A limit pricing

B predatory pricing

C price discrimination

D price leadership

3 A dentist is found to have charged patients for treatment they did **not** need.

What is the likely cause of this market failure?

A a minimum price

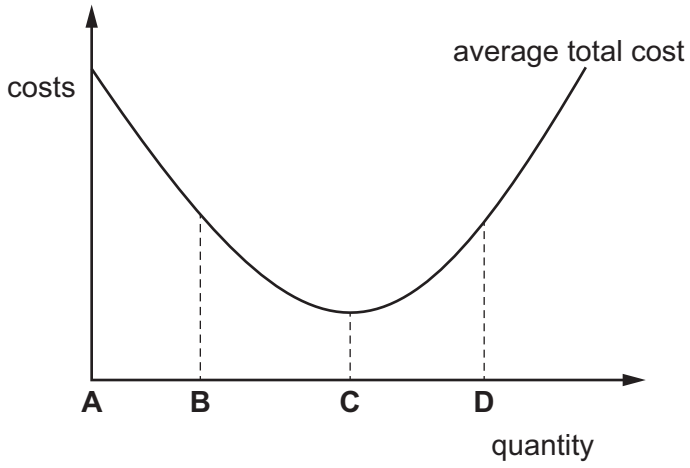

B asymmetric information

C non-excludability

D productive inefficiency

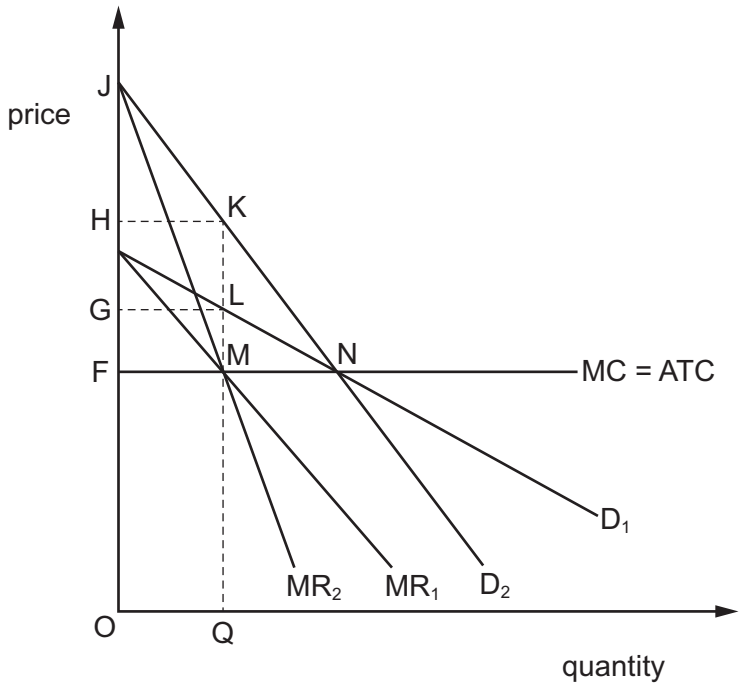

4 The diagram shows the average total cost for a firm.

At what level of output does marginal cost exceed average total cost?

© UCLES 2025

5 The diagram shows the effect of a demand curve shift from D_1 to D_2 for a profit maximising firm.

What has happened to the firm's total revenue and the deadweight welfare loss?

	total revenue	deadweight welfare loss
A	decreases to OGLQ	decreases by KLN
B	decreases to OGLQ	increases by KLN
C	increases to OHKQ	decreases by KLN
D	increases to OHKQ	increases by KLN

6 A firm sells 10 000 units per month at a price of $10. The firm's total fixed cost is $40 000 per month. The firm makes only normal profit.

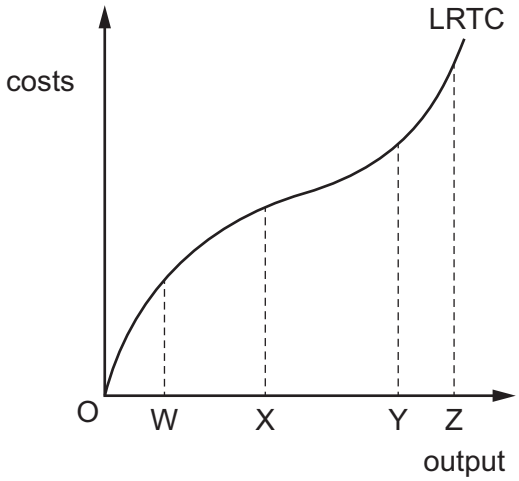

What is the average variable cost for this output?

A $2.00 **B** $4.00 **C** $6.00 **D** $8.00

© UCLES 2025

[Turn over

7 The diagram shows the long-run total cost (LRTC) curve of a firm.

At which output is the long-run average total cost at its minimum?

A OW **B** OX **C** OY **D** OZ

8 Assuming there are no externalities, where would a nationalised firm set output to maximise social welfare?

A where average revenue equals average cost

B where average revenue equals marginal cost

C where marginal revenue equals marginal cost

D where marginal revenue is zero

9 There has been an increase in labour productivity.

Which combination of effects is most likely?

	shift of demand curve for labour	shift of supply curve for labour	effect on wage rate
A	none	inward	increase
B	none	outward	decrease
C	inward	none	increase
D	outward	none	increase

© UCLES 2025

10 Which method of government intervention may correct market failure caused by the under-consumption of a merit good?

A minimum price

B privatisation

C indirect taxation

D subsidy

11 Some governments introduce rent controls (maximum prices) on houses rented from private landlords. They impose such rent controls to improve living standards for individuals with low incomes.

What might be the effects of rent controls in the long run?

A The long-run supply of rental houses will contract.

B The number of unoccupied privately rented houses will increase over time.

C The price of owner-occupied houses will increase.

D There will be no effect on the supply of rental housing.

12 To reduce the damage done by cigarette smoking, the government of a country increases the indirect tax on cigarettes and makes it illegal to smoke in public.

Which combination of circumstances is most likely to result in government failure in its attempt to reduce the damage done by cigarette smoking?

	price elasticity of demand for cigarettes	government spending on law enforcement
A	> 1	high
B	> 1	low
C	< 1	high
D	< 1	low

13 Which stage of the business (trade) cycle is most likely to be characterised by an increasing negative output gap?

A boom

B recession

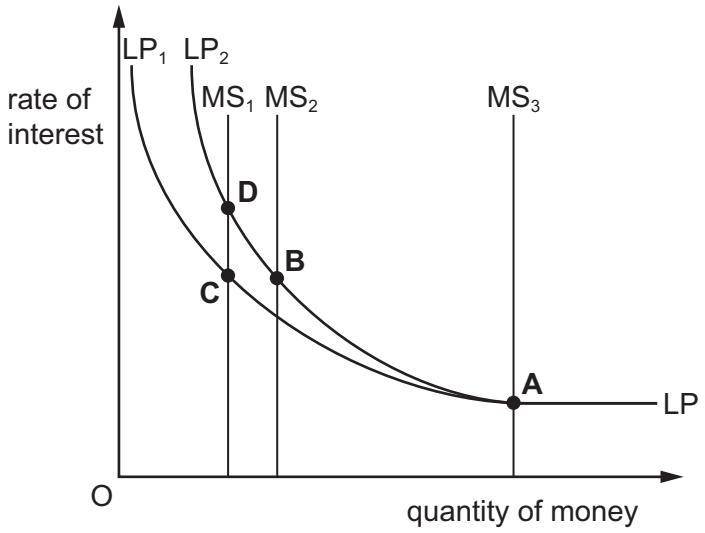

C recovery

D trough

© UCLES 2025

14 Sometimes monetary policy is ineffective. The supply of money (MS) is assumed to be controlled by the central bank. The demand for money is LP. There has been an increase in real income in the economy.

Which position on the diagram makes expansionary monetary policy ineffective?

15 Which policy is most likely to lead to a reduction in the natural rate of unemployment?

A an increase in government expenditure on goods and services

B an increase in government expenditure on training schemes to address skill shortages

C an increase in the period when the unemployed are eligible for welfare benefits

D an increase in the minimum wage

16 On a diagram showing a production possibility curve, what definitely represents long-run economic growth?

A a change in the slope of the curve

B a movement from a point below the curve to a point on the curve

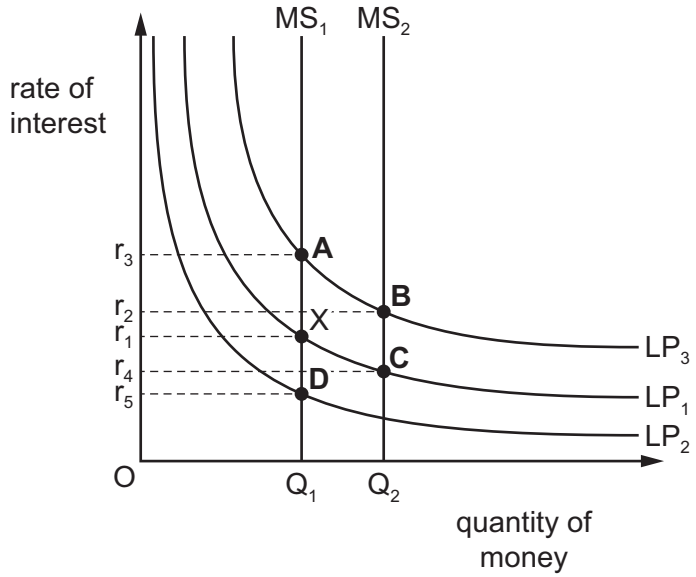

C a movement from one point to another along a given curve

D an outward shift of the curve

© UCLES 2025

17 The diagram shows equilibrium in the money market at point X.

If there is an increase in the level of income in the economy, which point shows the new equilibrium in the short term?

18 Which combination of policies is most likely to reduce cyclical unemployment but might increase frictional unemployment?

	direct taxes	unemployment benefits
A	decrease	decrease
B	decrease	increase
C	increase	decrease
D	increase	increase

19 What would cause the short-run Phillips curve to shift to the right?

A the unemployment rate is above the natural rate of unemployment, decreasing inflationary expectations

B the unemployment rate is above the natural rate of unemployment, increasing inflationary expectations

C the unemployment rate is below the natural rate of unemployment, decreasing inflationary expectations

D the unemployment rate is below the natural rate of unemployment, increasing inflationary expectations

© UCLES 2025

[Turn over

20 Which macroeconomic policy is most likely to be used as a long-run means of reducing inflationary pressures?

A exchange rate policy

B fiscal policy

C supply-side policy

D monetary policy

21 The table identifies pairs of possible government aims. The achievement of aim 1 needs to be consistent with the achievement of aim 2.

Which row shows the combination where both aims are likely to be achieved.

	aim 1	aim 2
A	higher foreign exchange rate	lower rate of unemployment
B	low rate of inflation	current account surplus
C	more even distribution of income	higher rate of saving
D	rapid economic growth	sustainable economic development

22 The central bank of an economy decreases the money supply in an attempt to reduce inflation.

Under which conditions is this policy most likely to be effective?

	exchange rate	responsiveness of aggregate demand to interest rate changes
A	fixed	low
B	fixed	high
C	floating	low
D	floating	high

© UCLES 2025

23 A government reduces both the income tax paid by all earners and the amount of means-tested benefits paid to those receiving low or no incomes.

What is most likely to be its objective?

A a more equitable income distribution

B a reduction in the rate of inflation

C a reduction in the trade deficit

D an increase in the rate of economic growth

24 What is **not** a likely feature of a customs union?

A common external tariffs with non-member nations

B elimination of tariffs between member nations

C elimination of quotas between member nations

D shared common currency among member nations

25 A central bank officially lowers the price of its currency relative to an agreed rate in terms of other currencies.

What type of central bank policy is this?

A appreciation

B depreciation

C devaluation

D revaluation

26 Which combination of events would cause the biggest increase in real GDP per capita?

	GDP	population	general price level
A	rises	falls	falls
B	rises	falls	rises
C	rises	rises	falls
D	rises	rises	rises

© UCLES 2025

[Turn over

27 A low-income country receives aid from a high-income country.

When will this aid give maximum benefit in the long term to the low-income country?

	type of aid	purpose of the aid
A	grant	purchase of agricultural machinery
B	grant	payment of food subsidies
C	loan	purchase of agricultural machinery
D	loan	payment of food subsidies

28 Which variable is included in the calculation of **both** the Human Development Index (HDI) and the Multidimensional Poverty Index (MPI)?

A child mortality rate

B gross national income (GNI) per capita

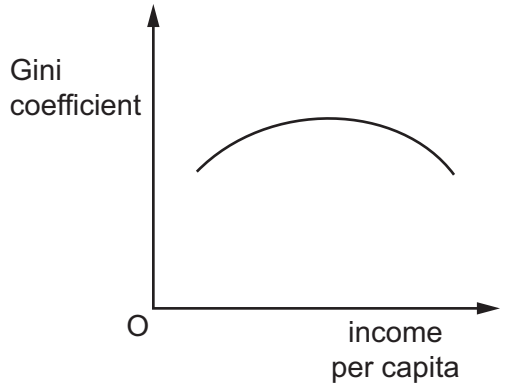

C life expectancy at birth

D years of schooling

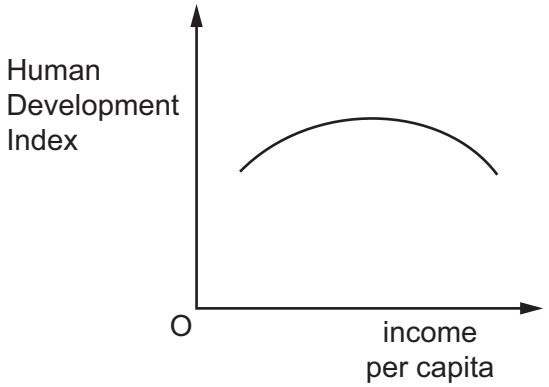

© UCLES 2025

29 Which diagram is **not** an example of a Kuznets curve?

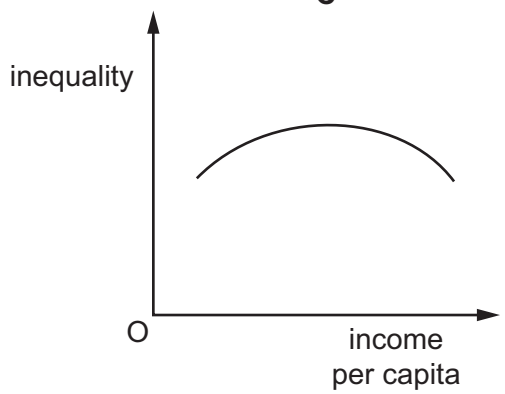

A

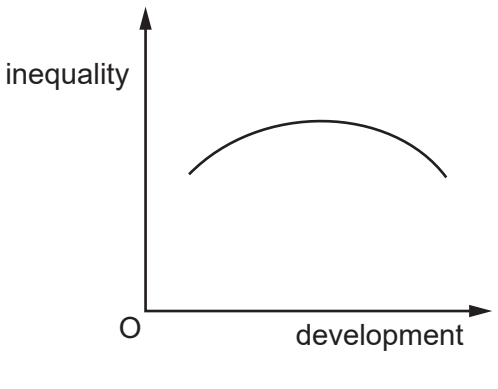

B

C

D

30 The table shows the value of the Gini coefficient for an economy from 2018 to 2020.

year	Gini coefficient
2018	0.29
2019	0.28
2020	0.27

What is most likely to explain the change in the value of the Gini coefficient between 2018 and 2020?

A an increase in indirect taxes

B an increase in long-term unemployment

C an increase in the national minimum wage

D an increase in population

Cambridge International AS & A Level

ECONOMICS **9708/34**

Paper 3 A Level Multiple Choice **October/November 2025**

1 hour 15 minutes

You must answer on the multiple choice answer sheet.

6316912461

You will need: Multiple choice answer sheet
Soft clean eraser
Soft pencil (type B or HB is recommended)

INSTRUCTIONS

- There are **thirty** questions on this paper. Answer **all** questions.
- For each question there are four possible answers **A**, **B**, **C** and **D**. Choose the **one** you consider correct and record your choice in soft pencil on the multiple choice answer sheet.
- Follow the instructions on the multiple choice answer sheet.
- Write in soft pencil.
- Write your name, centre number and candidate number on the multiple choice answer sheet in the spaces provided unless this has been done for you.
- Do **not** use correction fluid.
- Do **not** write on any bar codes.
- You may use a calculator.

INFORMATION

- The total mark for this paper is 30.
- Each correct answer will score one mark.
- Any rough working should be done on this question paper.

1 What will act as a barrier to collusion between firms?

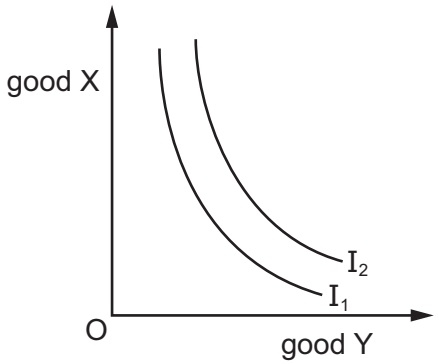

A an ability to detect price cuts by rivals

B the abolition of anti-trust measures

C the existence of a small number of firms in the industry

D unstable demand conditions for products

2 The diagram shows two indifference curves.

What do indifference curves indicate?

A Consumers get more satisfaction on curve I_1 from consuming more of X and less of Y.

B Consumers get more satisfaction on curve I_2 from consuming less of X and more of Y.

C Each point on the curve represents the marginal rate of substitution of good X for good Y.

D Movement from I_1 to I_2 cannot be made unless the indifference curves cross.

3 What is an example of forward vertical integration?

A A firm manufacturing computers merges with a firm that manufactures furniture.

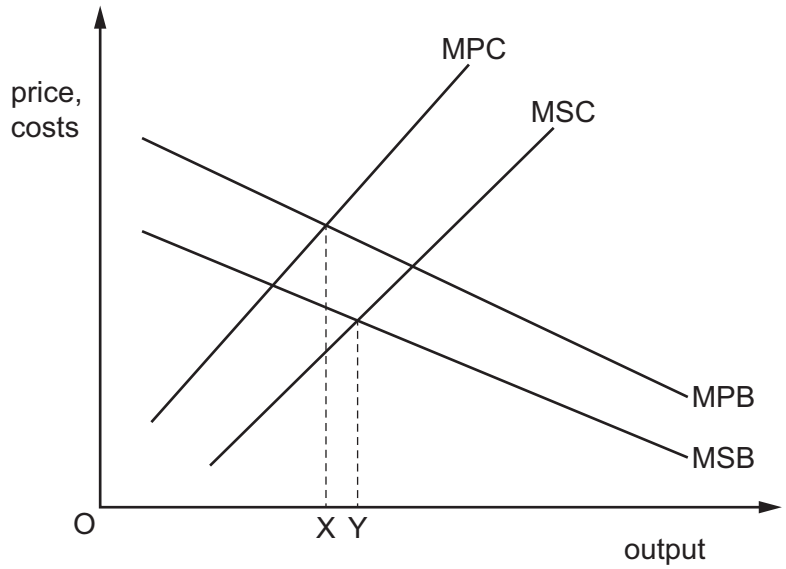

B A firm manufacturing computers merges with a firm that manufactures silicon chips for computers.

C A firm manufacturing computers merges with a retail outlet that sells computers.

D A firm manufacturing computers merges with another firm that also manufactures computers.

© UCLES 2025

4 The diagram shows positive and negative externalities of production and consumption.

Which row shows the correct combination of production and consumption externality when economic welfare is maximised?

	position of economic welfare	production externality	consumption externality
A	X	negative	negative
B	Y	positive	negative
C	X	negative	positive
D	Y	positive	positive

5 A firm has fixed costs of $300 and can produce two units per hour. Its total variable costs are $200 for one unit and $300 for two units.

Which cost will fall by the lowest amount when the second unit is produced?

A average fixed cost

B average total cost

C average variable cost

D marginal cost

© UCLES 2025

6 What is the most likely evidence that an economy has reached a position of Pareto optimality?

A price volatility

B a large current account deficit

C a regressive taxation system

D full employment

7 A firm is operating at a level of output which corresponds to the point where MR = 0.

What objective is the firm achieving?

A maximising consumer surplus

B maximising profit

C maximising sales

D maximising revenue

8 What is a potential benefit of the privatisation of a country's railway services?

A higher levels of competition

B higher costs passed on in the form of higher prices

C opportunity for government regulation

D potential for a private monopoly

9 Which of these actions illustrates equality rather than equity?

A A firm that installs ramps to its workplace to improve the access for people with disabilities.

B A government subsidy on rice of $0.10 per kilo for all members of the public.

C A university admissions policy that offers places to students from disadvantaged socio-economic backgrounds.

D An income tax system where high-income earners pay a higher percentage of income as tax.

© UCLES 2025

10 There is a decrease in the supply of female labour.

What will the likely effect on male and female wages be?

	male wages	female wages
A	decrease	decrease
B	decrease	increase
C	increase	decrease
D	increase	increase

11 A government introduces a national minimum wage.

What is **not** a benefit of this to the economy?

A It boosts the morale of workers and enhances labour productivity.

B It raises incomes of poorer workers.

C It reduces government spending on welfare payments.

D It reduces structural unemployment.

12 An increase in which variable would shift the supply curve for farm workers to the right?

A job security

B the hourly wage rate

C the productivity of farm workers

D the qualifications required

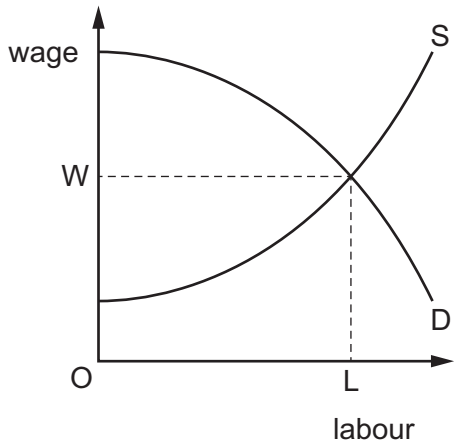

13 Which combination of policies is most likely to reduce the number of low-paid workers caught in the poverty trap?

	individual's tax-free allowance for income tax	national minimum wage in real terms
A	decrease	increase
B	decrease	unchanged
C	increase	increase
D	increase	unchanged

© UCLES 2025

14 The diagram represents the demand and supply of labour in a competitive industry.

What is true about unit of labour L when they are paid wage W?

A L is paid only economic rent.

B L is paid an element of economic rent and transfer earnings.

C L is paid below transfer earnings and leaves the industry.

D L is paid exactly transfer earnings and remains in work.

15 What leads to an inflationary gap?

A Aggregate demand is greater than the maximum potential output of the economy.

B Investment increases at a greater rate than profits received by a firm.

C The economy is operating below its full capacity.

D Innovation results in increased productivity in the economy.

16 An open economy has a positive output gap.

What is likely to be decreasing?

A expenditure on imports

B leisure time of workers

C nominal wage rates

D the general price level

© UCLES 2025

17 In a two-sector economy, autonomous consumer expenditure increases by $100 billion, autonomous investment expenditure increases by $200 billion, and the marginal propensity to consume is 0.5.

What will the increase in National Income be?

A $150 billion

B $300 billion

C $450 billion

D $600 billion

18 Which government policy is least likely to promote inclusive economic growth?

A increasing the national minimum wage

B investment in transport and infrastructure

C legislation reducing the power of trade unions

D using taxes and transfer payments to redistribute income

19 What is an example of a demand-side macroeconomic policy that would reduce cyclical unemployment?

A an increase in government spending on new infrastructure such as roads

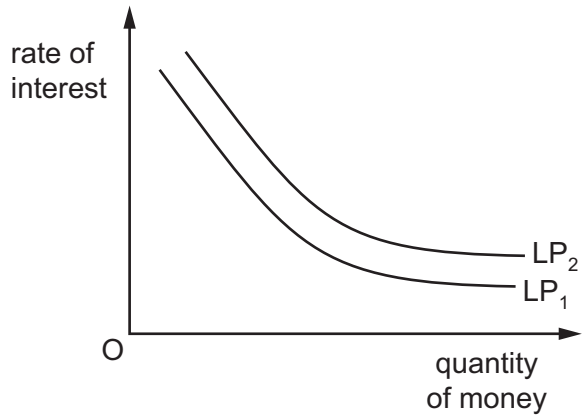

B an increase in government spending on retraining workers

C a reduction in the rate of tax on imports

D an increase in the rate of tax on goods and services

© UCLES 2025

20 The diagram shows two liquidity preference curves LP_1 and LP_2.

What would cause the liquidity preference curve to shift from LP_1 to LP_2?

A There has been a fall in national income.

B There has been a rise in the general price level.

C There has been an increase in government borrowing.

D There has been an increase in the rate of interest.

21 What does the Phillips curve show?

A the relationship between economic growth and employment

B the relationship between inequality and income per capita

C the relationship between inflation and unemployment

D the relationship between prices and national income

22 A government is aiming to increase the role of market forces.

Which policy might achieve this?

A deregulation

B nationalisation

C price controls

D production quotas

© UCLES 2025

23 A country has a progressive income tax system.

What is **not** a valid reason for a government's decision to reduce the rate of income tax paid on higher incomes?

A to attract highly skilled workers from abroad

B to prevent tax evasion

C to provide work incentives

D to reduce income inequalities

24 A political party proposed a policy of quantitative easing (the creation of money by the central bank).

When would such a policy be least likely to destabilise the macroeconomy in the short run?

A when the economy was experiencing a high level of inflation

B when the economy had price stability but there was full employment of the labour force

C when there was a deep recession with high levels of unemployment

D when there was full employment and a current account balance of payments deficit

25 What does the Laffer curve show?

A the amount of tax revenue received at each tax rate

B the impact on the distribution of income after tax rates rise

C the rise in inflation following a fall in unemployment due to a cut in income tax

D the rise in poverty due to a rise in the basic rate of income tax

26 What are the variables identified on the axes of a Kuznets curve diagram?

	vertical (Y) axis variable	horizontal (X) axis variable
A	cumulative % of income	cumulative % of families
B	measure of inequality	income per capita
C	measure of standard of living	economic growth rate
D	income per capita	optimum population

© UCLES 2025

[Turn over

27 What might cause income inequality to worsen in a country?

A increased discrimination

B increased labour market participation

C increased skill level of workers

D increased welfare payments

28 A multinational company is planning to invest in a new factory in a low-income country.

What is **not** a possible benefit to the low-income country?

A acquiring improved technology

B better training for the workforce

C extra tax revenue for the government

D increased competition for small domestic producers

29 A country with fixed exchange rates faces a surplus on its current account.

Which policy is most desirable to maintain the fixed exchange rate?

A an increase in subsidies given to exporters

B the imposition of trade barriers on the import of non-essential goods

C the sale of foreign currencies in the foreign exchange market

D the use of expansionary monetary policy

30 Which criticism of foreign direct investment (FDI) is **least** valid?

A It encourages competition, reduces prices and forces the less efficient domestic firms to leave the market.

B It brings workers from its own country and provides only low paying jobs to low skilled local workers.

C It is usually withdrawn quickly in case of a global crisis, making developing countries more vulnerable to global shocks.

D Its actions often result in environmental degradation, and over exploitation of natural resources.
