Questions

Q1.

Extract A

West End ticket prices reach all time high

The price of West End theatre tickets in London has reached an all-time high. In the past year alone, up to January 2013, the average top-price ticket has risen by almost £10 and now stands at £81.05. In January 2013, London theatres announced record numbers of people wanting to buy tickets for shows. Costs of running the theatres have also risen because there are restoration costs to pay and energy costs have increased. This rise in costs is despite some of the theatres in the West End receiving subsidies. 5

(Source: adapted from 'West End theatre tickets more expensive than ever, says The Stage,' by Matt Trueman, *The Guardian*, 5 April 2013
<http://www.theguardian.com/stage/2013/apr/05/west-end-ticket-price-discrepancy>)

(a) Explain why the price of 'the average top-price ticket has risen by almost £10' (Extract A, line 2). Use a supply and demand diagram in your answer.

(5)

Extract B

Cineworld merger with Cinema City International (CCI)

The UK's biggest cinema chain by market share is to enter seven overseas markets through a £900m merger. Cineworld announced that it has agreed to merge with CCI which owns 100 multiplex cinemas in seven countries Bulgaria, Czech Republic, Hungary, Israel, Poland, Romania and Slovakia. The deal is expected to be promoted as a merger of equals although Cineworld is larger than its new partner. The planned merger with CCI follows a fall of 1% in the revenue earned by cinemas in the UK and Ireland in 2013 to £1.17bn. 5

In 2013, Cineworld was ordered by competition regulators to sell three cinemas following its takeover of the Picturehouse chain. This underlined the difficulty of finding new growth opportunities in the company's home market, which was one factor prompting a search for international expansion opportunities. 10

Cineworld's UK-based rivals have also grown overseas, with Odeon UCI having a presence in seven countries, while Canadian-owned Vue Entertainment has cinemas in Portugal, Taiwan, Germany and Denmark.

The combined group is to be run by CCI's chief executive, although other senior management will be drawn from the ranks of both companies and the board will have more Cineworld board members. 15

(Source: adapted from 'Cineworld Targets Europe With £900m Merger,' By Mark Kleinman, Sky News, 9th January 2014
<http://news.sky.com/story/1192823/cineworld-targets-europe-with-900m-merger>)

(b) Examine **two** reasons Cineworld plans to merge with CCI.

(8)

Adult (19–59 yrs)	£9.60
Child (2–14 yrs)	£6.80
Student (15–18 yrs)	£7.30
Senior (60+ yrs)	£7.30
Family of 4	£29.80

Figure 1

Cineworld (London) cinema ticket prices after 5pm

(c) With reference to Figure 1, discuss the likely impact of price discrimination on Cineworld's profit. Include an appropriate diagram in your answer.

(12)

(d) Apart from price discrimination, assess **one** pricing and **one** non-pricing strategy Cineworld could adopt to increase sales.

(10)

Extract C

Cineworld investigation by Competition Commission (competition regulator)

Cineworld had to sell cinemas in three towns after the Competition Commission (CC) concluded that its acquisition of the Picturehouse chain would lead to higher prices for customers in Aberdeen, Bury St Edmunds and Cambridge. While Cineworld operates mainly in large out-of-town-centre cinemas, Picturehouse's cinemas tend to be smaller and located in city centres.

5

The CC has concluded that the acquisition could lead to a substantial lessening of competition in the cinema market in Aberdeen, Bury St Edmunds and Cambridge – where Cineworld and Picturehouse face limited competition.

(Source: <http://www.competition-commission.org.uk/media-centre/latest-news/2013/aug/cineworld-could-have-to-sell-cinemas>)

(e) Discuss the likely impact of 'a substantial lessening of competition in the cinema market in Aberdeen, Bury St Edmunds and Cambridge' (Extract C, line 6–7).

(15)

(Total for question = 50 marks)

Q2.

Mozambique

Figure 2: Interest rates (bank rate of the central bank) and inflation rates of selected African countries, 2017

Selected country	Central bank rate of interest	Inflation rate (CPI measure)
Congo (D.R.)	14%	13.8%
Ghana	21%	9.1%
Kenya	10%	10.1%
Malawi	18%	21.4%
Mozambique	21.75%	18.0%
Nigeria	14%	21.1%

(Source: official government websites, and other news sources, July 2017)

Extract D

Rising debt levels in Africa

Increases in national debt have brought several African governments towards a debt-servicing crisis when the repayment of debt and interest become unsustainable. Between 2010 and 2015, many sub-Saharan countries raised debt totalling more than £20 billion. Back then, with commodity prices soaring and foreign loans available at very low interest rates, everyone agreed that borrowing was the way to grow an economy with expansionary fiscal policy. Since 2015, some African governments – beneficiaries of big debt write-offs at the start of the century – have taken to private debt markets too eagerly, leaving them with heavy repayment schedules at a time of lower commodity prices.

Until recently, the International Monetary Fund (IMF) has played down African debt concerns, pointing to better management of public resources and greater transparency. But it was shaken by Mozambique's default on more than £2 billion of secret loans used to purchase a non-existent tuna-fishing fleet, raising fears of hidden debt in other African countries with similar levels of corruption. The median level of debt in sub-Saharan Africa had risen sharply from 34% of gross domestic product in 2013 to 48% in 2017. Although that is low by international standards, analysts said debt burdens were heavier than they appeared because of most African countries' low tax base. "The real thing to look for is debt to revenue, or debt-service as a percentage of government spending," said John Ashbourne, Africa Economist at Capital Economics. In several countries, he said, debt payments were above 20% of government revenue, with an opportunity cost in terms of government spending.

(Source: adapted from African debt worries intensify as levels near tipping point by David Pilling © Financial Times 2017 <https://www.ft.com/content/939808dc-b4d8-11e7-a398-73d59db9e399>)

Extract E

Mozambique's economic stability is being put to the test

The economy of Mozambique, which gained independence from Portugal in 1975, has continued to under-perform. Large-scale emigration, especially of skilled workers, economic dependence on South Africa, a severe drought, a prolonged civil war and political tensions have hindered the country's development. More than half of Mozambique's 26 million people continue to live below the poverty line. 5

GDP growth declined to 3.6% in 2016 due to fiscal tightening and a slowdown in foreign direct investment. A weak manufacturing sector employs just 3.2% of the population, and is made up of small enterprises (90%), many of which were set up with the aid of microfinance. Traditional export earnings dropped due to depressed global demand. 10
In addition a wide-scale drought seriously affected agricultural production. Foreign currency inflows have weakened – as large-scale gas projects were put on hold, and 14 external lenders suspended direct budget support, as a lesson to be learned from the tuna-fleet scandal. The state budget deficit was 10.7% of GDP in 2017. High interest rates have reduced aggregate demand, and import costs added to inflation following further depreciation of Mozambique's currency, the *metical*, to a new low of 100 meticals to £1. 15

Mozambique needs urgently to improve its investment environment and confidence in its institutions. The World Economic Forum's global competitiveness ranking placed Mozambique 136 out of 137 countries.

Longer term, Mozambique's economic prospects are promising. There has been progress in talks on restoring international confidence in the government's running of the economy, leading to a lasting and sustainable agreement between rival political groups. The development of gas fields off Mozambique's coast discovered in 2011 is set to transform the economy, coming into production in the 2020s. A rise in coal and electricity exports should help growth to increase. But in the short term, it remains uncertain whether Mozambique can deliver badly needed economic stability. 20
25

(Source: adapted from <http://www.africaneconomicoutlook.org/en/country-notes/mozambique> and <https://www.chathamhouse.org/expert/comment/mozambique-s-stability-being-put-test> 6 October 2017 Dr Alex Vines OBE)

Extract F

Microfinance in Mozambique

Microfinance in Mozambique started in the late 1980s through projects initiated by international relief organisations. The sector has expanded to include many private banks and non-government organisations (NGOs), see Figure 3. This has resulted in wider use (over 100 000 borrowers) and many new business start-ups which could not have gained finance from any other source. Evidence suggests that there is unfulfilled demand for microfinance and a large potential for expansion. 5

(Source: adapted from <http://www.mftransparency.org/microfinance-pricing/mozambique/>)

Figure 3: The cost of microfinance loans in Mozambique, 2015

(Source: <http://www.mftransparency.org/microfinance-pricing/mozambique/>)

(a) With reference to Extract D line 21, explain why 'opportunity cost' is a problem for governments of developing countries when servicing debt.

(5)

(b) Examine **two** reasons, apart from access to finance, why 90% of the manufacturing sector in Mozambique 'is made up of small enterprises' (Extract E, line 9).

(8)

(c) Discuss whether borrowers benefit from microfinance. Make reference to Mozambique in your answer.

(12)

EITHER

(d) Evaluate the microeconomic and macroeconomic factors, apart from access to credit and banking, influencing growth and development in Mozambique.

(25)

OR

(e) Evaluate the likely microeconomic and macroeconomic effects of relatively high inflation rates in many African countries.

(Total for question = 50 marks)

Q3.

Energy and telecommunication markets in the UK**Figure 1: Average annual household bill from the Big Six UK energy suppliers, 2017**

(Source: <https://www.lovemoney.com/news/67298/standard-variable-tariff-compared-cheapest-deal-provider-savings>)

Extract A**Energy price cap to fix 'broken' market in UK**

The Prime Minister recently said that the regulator Ofgem (Office of Gas and Electricity Markets) should limit electricity and gas suppliers' most expensive tariffs.

Under the planned new legislation, the energy bills of 11 million households will be capped for as long as five years. The government claimed this cap could save households up to £100 a year. This legislation would force Ofgem to change the licence conditions for energy suppliers so that they are required to cap electricity and gas prices. The measure will apply to anyone on a standard variable tariff, the expensive plans that customers are moved to when cheaper, fixed-price deals end. Ofgem will need to consult energy companies on how the cap is calculated, the government said. The Prime Minister repeated her claim that she had to act because the 'market is broken', a charge the big energy companies reject. "I have been clear that our broken energy market has to change – it has to offer fairer prices for millions of loyal customers who have been paying hundreds of pounds too much," she said.

However, Michael Lewis, chief executive of E.ON said "the government must guard against any unintended consequences that undermine customer service and push up prices as a whole. A price cap will not be good for customers. It will reduce competition and innovation". Smaller suppliers such as First Utility said the Big Six had only themselves to blame for the cap, because they had kept millions of people on standard variable tariffs.

(Source: adapted from 'UK puts energy efficiency at heart of climate change strategy', Adam Vaughan, Copyright Guardian News & Media Ltd 2017 <https://www.theguardian.com/money/2017/oct/12/may-energy-price-cap-ofgem-electricity-gas-tariffs>)

Figure 2: The monthly rental cost of a telephone landline

*Wholesale line rental – the rental price BT Openreach charges telephone service providers

(Source: <https://www.ofcom.org.uk/about-ofcom/latest/features-and-news/landline-prices-review>)

Extract B

BT profit rises

BT Group, which includes BT Openreach and BT Retail, reported a rise in profit as revenue increased following the integration of the consumer mobile business, EE. BT finalised the takeover of EE in August 2016, and the integration has resulted in BT controlling 35% of the mobile consumer market. The profit of the UK-based telecommunication group in its second quarter 2017 rose to £566 million. 5

BT Group chief executive Gavin Patterson said: “We will operate a multi-brand strategy with UK customers being able to choose a mix of BT, EE or Plusnet services, depending on which suits them best. The acquisition enables us to offer great value bundles of services and customers are set to be the winners as we compete for their business”. 10

(Source: adapted from www.marketwatch.com (Oct 27 – 2016) and <http://home.bt.com/news/bt-life/bt-to-retain-ee-brand-as-acquisition-confirmed-11364037422234>)

Extract C

BT to slash landline charges for 1 million customers

Rental charges for landline-only customers – households with a telephone-only contract but no BT broadband – will fall from £18.99 to £11.99 per month after the regulator attacked existing deals as ‘poor value for money’. This rental reduction will save a million landline-only customers £84 a year. 5

The regulator Ofcom (Office of Communications) said it stepped in because these bills for landline-only customers – nearly two-thirds of whom are over 65 – have “soared” in recent years. This is despite BT and other landline providers benefiting from significant cuts in the wholesale line rental cost of providing the service by BT Openreach. Many landline-only customers are elderly, and have been with BT for decades. Ofcom has focused on BT because it accounts for two-thirds of the UK’s 1.5m landline-only customers. 10

A spokesperson for Ofcom said “This position [of dominance] has allowed BT to increase prices without much risk of losing customers, and other providers have followed BT’s pricing lead. We expect BT’s price cut to mean other providers will follow suit”. Ofcom said that over three-quarters of BT’s landline-only customers have never switched provider, which has left them a prime target for price rises. The regulator said that all major landline providers have increased their line rental charges by between 23% and 47% in recent years, while their own costs for providing the service have fallen about 27%. Ofcom said it is also looking at measures to help people shop around for better deals with more confidence. 15 20

(Source: adapted from ‘BT to slash landline charges for 1m customers’, Mark Sweney, Copyright Guardian News & Media Ltd 2017 <https://www.theguardian.com/business/2017/oct/26/bt-to-slash-landline-charges-for-1m-customers>)

(a) With reference to Extract A, explain the difference between a positive statement and a normative statement.

(5)

(b) With reference to Extract B, examine the likely benefits to consumers of the integration between BT and EE.

(8)

(c) With reference to Extract C, assess possible reasons why many ‘landline-only’ customers do not switch to a cheaper telephone provider.

(10)

(d) Discuss **one** likely reason for the rise in BT's profit (Figure 2, Extracts B and C). Use a cost and revenue diagram to support your answer.

(12)

(e) Discuss methods of government intervention to protect consumers within the utilities markets, such as energy and telecommunications.

(15)

(Total for question = 50 marks)

Q4.

Read extracts A and B before answering this question.

Hand car wash (HCW) firms in the UK

Extract A

What is the true human cost of your £5 hand car wash (HCW)?

The UK's hand car washes (HCWs) are extremely price competitive, but they have also been linked to modern slavery. Are they ever fair for workers?

There is little agreement about how many HCWs there are in the UK. Estimates range from 10 000 to 20 000. This lack of accurate information about the industry makes government regulation very difficult. Automated car washes, with their fierce rotating bristles, used to be the first option for drivers in a hurry. Now there is more choice. While the economy slows and incomes fail to keep up with inflation, demand for HCWs has grown. Many people see paying £5 for a car washed by someone else, rather than cleaning it at home, as a small expense which yields a high utility. But what is the true cost of a £5 car wash – and what should we be paying?

The growth of HCWs is partly the result of changes in the structure of industry in the UK. Many petrol stations have closed as drivers fill up at supermarkets. Garages and their forecourts have closed as cars become more reliable and locked into service agreements. The available sites for HCWs have therefore increased significantly and rents have fallen.

HCW entrepreneurs have identified available land and have benefitted from changes in the labour market, partly as a result of EU migration. UK drivers are now able to obtain cheap and effective hand car washing. For many migrants, car washes are a first job. "They accept car washing for a short period while they improve their language skills and move into other industries," says Ian Clark, a professor of work and employment at Nottingham Business School. "But there are also car-wash workers without networks who are in a dead end, working there for long periods."

Many drivers are only interested in getting the cheapest wash. If the price is very low, it probably means that workers are receiving less than the minimum wage and working in poor conditions. Crude calculations illustrate the problem. A £5 HCW employing five workers for 10 hours a day would need to wash 79 cars a day to just cover the wage costs. This assumes the workers are paid the minimum wage. This is one car every seven and a half minutes. Even if the profit can be higher on valet services, the price of which can be as little as £12 for a full inside-and-out clean, it's hard to see how a car wash price as low as £5 pays a living wage. This ignores all other costs which HCWs incur such as business rates and rent.

Evidence from car-wash workers is limited but Clark and others have been able to build a picture of some of the tougher conditions on drenched forecourts. "Like nail bars and small garment manufacturers, car washes are what we call 'hard-to-reach places,'" Clark explains. As part of the research, Clark and his team spoke to workers from 45 HCWs in the Midlands.

Clark and his team met and observed workers who lacked waterproof boots or trousers, or hi-vis jackets and gloves. "They're spraying around hydrochloric acid solution for alloy wheels, breathing in the vapour and fumes," Clark says. Some workers were paid a little over half the minimum wage.

(Source adapted from: <https://www.theguardian.com/world/2018/jul/16/true-human-cost-5-pound-hand-car-wash-modern-slavery>)

Extract B

Government intervention in the HCW industry

There are three main areas of government intervention that might impact on labour intensive firms such as HCWs:

First, there is the planning issue which focuses on the impact on the environment, for example, the disposal and recycling of waste water and chemicals. There could be planning regulations to prevent the use of tarmac rather than concrete on forecourts. Tarmac allows waste water and chemicals to seep into the sub soil. It could also be a requirement to have a sludge trap to stop the waste entering waterways. 5

Second, there is the health and safety issue for workers. Prolonged exposure to chemicals and lack of protective clothing puts the health of workers at risk. Performance targets could involve minimum levels of protective clothing and rest breaks for the workers. 10

Third, there is the issue of tax. The informal nature of the business type makes tax evasion easier.

Not all UK HCWs violate regulations. There are legitimate, regulated HCW firms as well as examples of good practice by independent outlets. One national supermarket, Tesco, has banned all independent hand car washes from its car parks. It is now in a partnership agreement with national car wash operator Waves. It uses a WashMark certificate of quality and compliance which was introduced by the industry to improve working conditions. Other major supermarkets are considering similar changes. One adviser believes £9 is a reasonable minimum price for a basic wash. Some pressure groups have developed a mobile phone app where evidence of unreasonable conditions can be reported by drivers. 15 20

Involving drivers in the issue, and making them demand fairer car washes, creates an incentive for good businesses to improve practices and come forward to get a WashMark certificate. 25

(Source adapted from: <https://www.parliament.uk/documents/commons-committees/environmental-audit/Hand-Car-Wash-evidence.pdf> research into HCWs by Professor Ian Clark, Nottingham Business School May 2018)

(a) Using the information provided, explain the market structure that best describes the hand car wash (HCW) industry in the UK. (5)

(b) Examine **two** reasons why the demand for HCWs increases during a period when consumer 'incomes fail to keep up with inflation' (Extract A line 8). (8)

(c) Discuss the likely effects of changes in the level of migration on firms such as HCWs in the UK. Use a labour market diagram and the information provided to support your answer. (12)

EITHER

(d) Evaluate the microeconomic and macroeconomic factors which determine the number of firms in an industry. Refer to HCWs or another industry of your choice. (25)

OR

(e) Evaluate the microeconomic and macroeconomic effects of increased government intervention in an industry. Refer to HCWs or another industry of your choice.

(Total for question = 50 marks)

Q5.

Read Figure 1 and the following extracts (A to C) before answering this question.

The food delivery industry

Figure 1: Market share for third-party food delivery services in the UK, 2019

(Source: adapted from <https://onefourzerogroup.com/the-takeaway-takeover/>)

Extract A

National Minimum Wage rises are more significant for 23 to 25-year-olds

In 2021, the National Minimum Wage main rate, also known as the National Living Wage, rose by 2.2% to £8.91, following a 6.2% rise in 2020. By reducing the age at which people are eligible for the National Living Wage to 23 in 2021, it is estimated that an additional 7.5% of 23 to 25-year-olds could get a 71p an hour pay rise. This amounts to an 8.7% increase, which may cause further financial worries for employers.

5

(Source: adapted from https://www.ndna.org.uk/NDNA/News/Latest_news/2020/Minimum_wages_to_rise_by_inflation_in_April.aspx)

Extract B

What is the true cost of the food delivery service?

The food delivery industry has boomed in recent years. Just Eat, Uber Eats and Deliveroo all offer very similar services – third-party food delivery firms that take up to 30% of the price of restaurant meals and deliver them to customers within a certain radius. The average spend per customer is around £15 with a £5 delivery fee, about five times more expensive than cooking at home and the same price as eating in the restaurant. Cash rich, time poor professionals increasingly turn to food delivery. 5

Food delivery comes with many layers of packaging. In the UK, there are 200 million meals annually with around 1.4 billion individual pieces of plastic for heat retention and protection when travelling, but does it really have to be plastic? People tend to order more food, often high in fat, sugar and salt, and don't even have to get up from their sofa. 10

But there are concerns that the delivery firms are exploiting employees who have no alternative. There is an issue of low pay and informal contracts. Delivery drivers are classed as 'independent contractors', and therefore not subject to some employment rights including a guaranteed minimum wage, sick pay, pensions or holiday pay. Drivers are paid either a flat hourly rate, or a fee per delivery. Factors such as delivery distance, speed, how busy it is and whether there are multiple drop-offs are all factored into how much a driver is paid. Deliveroo says its wages amount to around £10 per hour, but drivers say that during 2020 their pay has been as low as £1 per hour. Drivers are not paid extra for petrol or to maintain their vehicles. Many drivers are recent immigrants or students, who do not have property or savings to fall back on. 15 20

The government could address this with widening minimum pay legislation to contracted workers, by setting codes of practice, or by setting recommended wage targets. Furthermore, there are health and safety issues for workers. Vehicle safety checks, length of shifts and safety equipment are of concern. However, there are still people who take benefit from working flexibility. 25

(Source: adapted from <https://www.theguardian.com/australia-news/2020/oct/25/home-food-delivery-what-is-the-most-ethical-way-to-order-in> and https://digitalcommons.molloy.edu/cgi/viewcontent.cgi?article=1043&context=bus_fac)

Extract C

Integration in the third-party food delivery industry

The Competition and Markets Authority (CMA) is watching carefully to prevent any one firm having complete control of the food delivery industry. Just Eat, the market leader, agreed to merge with successful Dutch firm Takeaway.com in 2020, creating a new European leader by revenues. It also bought Grubhub in the US, with 20 million active users. Just Eat uses an aggressive pricing strategy, undercutting delivery fees below the average cost of other firms in the market, that will force them to merge in order to gain some economies of scale. 5

Amazon, having failed with its own delivery company Amazon Restaurants in 2018, has bought 16% of Deliveroo. The CMA took over a year to agree to the partial integration, on the argument that Deliveroo would close down without external investment. 10

Amazon has unique expertise in marketing, increasing customer share and, most importantly, efficiency in delivering things. Food delivery is often uneconomical because a single household puts in a single order from a single restaurant at any one time. Tech companies such as Amazon can improve the business: once a meal has been ordered, an app often moves that restaurant to the top of the rankings for that neighbourhood, in the hope of getting a second and third delivery. 15

So why do restaurants turn to these delivery firms? The sheer volume of customers these delivery firms can hold makes it a difficult deal to turn down. But resentment from small business restaurant owners, angry at being wholly dependent on tech companies, is growing. Most restaurants would prefer that customers come in and pick up their orders themselves because they do not have to pay the 30% commission. Restaurant profit margins are small, and the effects of a 20% fall in the external value of the pound since 2016 on food costs are significant, given that over half of their food and drink is sourced outside the UK. 20

(a) Using the information provided, explain **one** externality that arises in the food delivery market.

(5)

(b) With reference to Extract B, examine whether the demand for delivered food is price inelastic **and** income elastic.

(8)

(c) With reference to Extract C, discuss the likely effects of increasing integration within the food delivery market.

(12)

EITHER

(d) Evaluate the microeconomic and macroeconomic effects of a depreciation of the pound. Refer to restaurants or other food delivery services in your answer.

(25)

OR

(e) Evaluate the microeconomic and macroeconomic effects of significant increases in the minimum wage. Refer to restaurants or other food delivery services in your answer.

(25)

(Total for question = 50 marks)

Q6.

Use the data to support your answers where relevant. You may annotate and include diagrams in your answers.

In 2016, the insurance group Esure undertook a demerger with its GoCompare price comparison website.

(a) The most likely reason for this demerger was to:

(1)

- ☐ A benefit from external economies of scale
- ☐ B benefit from internal economies of scale
- ☐ C focus more on its core business
- ☐ D increase its market share

Following the demerger, GoCompare announced in 2017 a profit of £17.5 million, up 21.5% on 2016. Total revenue in 2017 was £75.8 million, up 4.1% on 2016.

(Source: adapted from <https://www.insuranceage.co.uk/insurer/3107496/profits-up-at-go-compare>)

(b) Calculate, using the information provided, the total costs of GoCompare in 2016.

Extract A

Marginal productivity of cabin crew

Cabin crew are responsible for loading passengers and providing in-flight meals. United Airlines is planning to reduce the number of its cabin crew members onboard international flights. The airline currently operates its planes with one more cabin crew member than its competitors. The marginal productivity of this additional crew member may be low. By reducing the number of its cabin crew members United Airlines will be able to operate more efficiently and compete more effectively.

5

(Source adapted from: <https://simpleflying.com/united-airlines-to-reduce-number-of-crew-on-international-flights/>)

Extract B

Thomas Cook's environmental impact

Thomas Cook Group plc's operations included its airline and 560 high street travel agents providing flights, hotels and package holidays.

The environmental impact of the travel industry is significant. It accounts for 8% of all global carbon emissions. Thomas Cook recognised the risks presented by climate change and actively engaged in reducing their airline emissions. Its plans included using more efficient aircraft and using lower-carbon fuel. In 2018, Thomas Cook was included in the top 10 of the world's most fuel-efficient airlines.

5

Extract C

Why did Thomas Cook shut down?

Thomas Cook Group plc ceased trading on 23 September 2019. The collapse of Thomas Cook left 600 000 travellers stranded overseas and approximately 21 000 worldwide employees were left without a job.

Thomas Cook's management said that the failure of rescue talks between banks, shareholders and the UK Government meant it had no choice but to shut down the business.

5

But in truth the tour operator's problems go back much further. A disastrous merger in 2007, increased debts, the internet revolution in holiday booking and Brexit uncertainty all contributed to the failure of the business.

10

In 2007 it merged with MyTravel. Thomas Cook directors had an objective of rapid company growth over short-term profitability. The merger was supposed to create a European giant, promising £75 million-a-year cost savings and a springboard to challenge emerging internet rivals. In reality, Thomas Cook was merging with a company that had only made a profit once in the previous six years, and the deal left the Group with huge debts. In May 2019, the firm reported a £1.5 billion loss.

15

The role of the management in Thomas Cook's collapse is being investigated by the UK Government. Thomas Cook executives' salaries and bonuses have been questioned. Directors received salaries totalling £20 million in the five years before its collapse. The Chief Executive Officer (CEO) earned a £500 000 cash bonus in 2017 and about £8.5 million in his five years with the company. It seems that around £4 million of this was in the form of shares. The share price reached £1.46 in 2018, but each share is now worthless.

20

The CEO said that the directors had worked "exhaustively" to rescue Thomas Cook and create a long-term turnaround strategy. "It is a matter of profound regret to me and the rest of the board that we were not successful."

25

The UK prime minister admitted that the government refused to grant £150 million as a subsidy to help rescue Thomas Cook in the short run. The UK prime minister stated: "Clearly, that is a lot of taxpayers' money and sets up, as people will appreciate, a moral hazard in the case of future such commercial difficulties that companies face. I have questions about whether it's right that the directors, or whoever, the board, should pay themselves large sums when businesses can go down the tubes like that. One is driven to reflect on whether the directors of these companies are properly incentivised to sort such matters out".

30

(Source adapted from: <https://www.theguardian.com/business/2019/sep/23/thomas-cook-as-the-world-turned-the-sun-ceased-to-shine-on-venerable-tour-operator>
and <https://www.ft.com/content/a7dd2554-de23-11e9-b112-9624ec9edc59>)

(a) Explain the likely impact of diminishing marginal productivity of labour on cabin crew staffing levels. Refer to Extract A in your answer.

(5)

(b) Examine the likely impact of Thomas Cook's plan 'to reduce their airline emissions' (Extract B, line 6) on the social optimum position. Use an appropriate externalities diagram in your answer.

(8)

(c) With reference to Extract C, assess whether Thomas Cook's failure was caused by the principal-agent problem.

(10)

(d) With reference to Extract C, discuss the proposed government subsidy to prevent Thomas Cook from reaching its shut-down point.

(12)

(e) With reference to the information provided, discuss the decision by Jet2 to increase its package holiday prices.

(15)

(Total for question = 50 marks)

Q8.

(a) With reference to Extract A, explain how migration out of Poland into Britain may affect the Polish production possibility frontier. Use an appropriate diagram in your answer.

(5)

(b) With reference to Extract A, assess **two** factors which might affect the geographical mobility of labour in the EU.

(10)

(c) Discuss the likely benefits of increased immigration from Eastern Europe for employers in the UK.

(12)

(d) Examine the likely reasons Hanson chose to grow 'through a number of mergers, to become one of the world's biggest companies' (Extract C lines 18 and 19).

(8)

(e) Discuss the likely impact of the demerging of conglomerates on efficiency.

(15)

(Total for question = 50 marks)

Q9.

Supermarket price war, food waste and possible mergers

Figure 1: Market shares by total revenue in the UK supermarket sector, 2010 and 2015

(Source: Kantar worldpanel, <http://www.kantarworldpanel.com/en/grocery-market-share/great-britain/snapshot/11.10.15/>)

Figure 2: Proportion of food suppliers reporting that the following supermarkets fail to meet the Groceries Code of Conduct, 2015.

(Source: YouGov poll of more than 1100 food suppliers to supermarkets. Reported in The Times, 23 June 2015)

Extract A

Supermarket price war puts pressure on their food suppliers

The number of food suppliers (to supermarkets) struggling to remain in business has increased by more than 50% over the past year as supermarkets engage in an intense price war. It has never been tougher for the UK's food suppliers according to a study by accountants Begbies Traynor. It blames aggressive price-cutting by the supermarkets and delays in payments to food suppliers as the main causes of the difficulties. Further problems include food suppliers being forced to pay excessive amounts for packaging specified by supermarkets and funding in-store promotions. Almost 90% of struggling food suppliers are small and medium-sized businesses.	5
The price war has contributed to food prices paid by consumers falling by 1.7% over the past two years.	10
The market shares of the big four supermarkets – Tesco, Asda, Sainsbury's and Morrisons – are under pressure as shopping habits change. Many consumers are switching from one main weekly shop to shopping more frequently at local discount stores such as Aldi and Lidl or purchasing goods online from other grocery retailers.	15
The big four supermarkets have responded by putting more pressure on their suppliers despite an investigation by the Groceries Code Adjudicator (GCA). The GCA has the power to fine supermarkets up to 1% of their annual sales revenue if they break the Groceries Code of Conduct. A YouGov study found considerable differences between the supermarkets in meeting the Code with Aldi performing well but Tesco badly. Despite the Groceries Code, many food suppliers are reluctant to complain for fear of losing contracts with the supermarkets.	20
(Source: adapted from 'Supermarket price war takes toll on UK food suppliers'. Rupert Jones, The Guardian, 20th July 2015)	

Extract B

Food waste in the supply chain

A report from the British Retail Consortium reveals that supermarkets are directly responsible for around 0.2 million tonnes of food waste every year. This is due to the expiry of use-by-dates and poor handling of stock.	
However, 4.1 million tonnes of food waste occurs annually in the food supply chain before it even reaches the supermarkets, indicating the existence of information gaps. The supermarkets are cooperating with food suppliers and farmers to try to reduce this waste. This involves improving forecasts for supply and demand of food and increasing the reliability of transportation and storage.	5
Consumers, the final stage of the supply chain, waste a further 7 million tonnes of food each year. This suggests irrational behaviour. Supermarkets are also working with consumers to reduce the waste by providing advice on how to store and use leftover food. The development of packaging designs to keep food fresher for longer is one of the innovations under way to reduce waste.	10
(Source: adapted from 'Supermarkets tally up food waste bill'. Will Nicholls, in Businessgreen, 19th January 2015. http://www.businessgreen.com/bg/news/2390792/supermarkets-tally-up-food-waste-bill)	

Extract C

Proposed merger activity in the supermarket sector

Analysts at Société Générale, an investment bank, have recommended a merger between Sainsbury's and Morrisons. They claim it would lead to increased economies of scale and market power for the combined business. Such a merger between the third and fourth largest supermarkets in Britain would have been unrealistic a few years ago due to concerns of its impact in reducing competition. However, the chances of getting permission from the Competition and Markets Authority have increased following the growth of Aldi and Lidl. Giant mergers have been approved in other sectors such as Lloyds-HBOS (banking) and British Telecom-EE (telecommunications).

5

The suggested merger would have its challenges. There is considerable overlap between the locations of the stores and the enlarged company would require the rationalisation and co-ordination of hundreds of thousands of employees. A new expensive IT system is likely to be required and the underlying difficult market trends would remain in the food retailing industry.

10

(Source: adapted from 'Tesco-bury and AS-Morrisons. Could Britain's supermarkets be about to merge?' Graham Ruddick, in The Telegraph, 16th December, 2015. <http://www.telegraph.co.uk/finance/newsbysector/retailandconsumer/11699724/Tesco-burys-and-AS-Morrisons.-Could-Britains-supermarkets-be-about-to-merge.html>)

(a) With reference to Figure 1 and Extract A, explain **one** likely reason for the change in the four-firm concentration ratio of the supermarket sector between 2010 and 2015.

(5)

(b) With reference to Figure 2 and Extract A, discuss the possible impact of supermarket monopsony power on both food suppliers and consumers.

(12)

(c) Examine measures the government might use to restrict the monopsony power of supermarkets.

(8)

(d) Assess the extent to which 'information gaps' (Extract B, lines 5 and 6) and 'irrational behaviour' (Extract B, line 11) are the main causes of food waste in the UK.

(10)

(e) Discuss the likely problems for Sainsbury's and Morrisons if the suggested merger between them goes ahead. Refer to Figure 1, Extract C and your own knowledge in your answer.

(15)

(Total for question = 50 marks)

Mark Scheme

Q1.

Question Number	Answer	Mark
(a)	Knowledge 1, Application 1, Analysis 3 Knowledge/understanding: 1 mark for: - accurate supply and demand with original equilibrium. (1) Application: 1 mark for identifying either: - record numbers of people wanting to buy tickets for shows (1) - costs of running the theatres has risen to pay for restoration and absorb the cost of booking fees. (1) Analysis: 1 mark for each of the following: - supply shifted leftwards (1) - demand shifted rightwards (1) - accurate new equilibrium showing higher price. (1) For example:	(5)

Question Number	Answer	Mark
(b)	Knowledge 2, Analysis 2, Application 2, Evaluation 2 Knowledge/understanding: 2 marks for identification of two reasons (1+1). Analysis: 2 marks for linked explanation of these reasons (1+1). Application: 2 marks for reference to the data (1+1), e.g. • to enter seven overseas markets (1) – including Bulgaria, Czech Republic, Romania, Hungary, Israel, Poland, Romania and Slovakia/ operates almost 100 multiplexes (1) which increases the quantity of potential consumers (1) • to establish a European multiplex powerhouse (1) – CCI operates almost 100 multiplexes (1) which increases the quantity of potential consumers at each location (1) • Cineworld was ordered by competition regulators to offload three cinemas following its takeover of the Picturehouse chain (1). Difficulty of finding new growth opportunities in the company's home market (1) so moving abroad enables expansion (1) • industry data by Rentrak showing that UK and Ireland box office takings in 2013 fell by 1% to £1.17bn (1) falling demand in UK (1) and markets in Europe may be growing (1) • rivals have also grown overseas, with Odeon UCI and Vue Entertainment (1) and this suggests is a rational decision for the business to make (1) as their competitors are likely to have moved to maximise profits. (1)	

	Evaluation: 2 marks for two evaluative comments, e.g. • however, some of the countries they are moving to are poorer than the UK (1) • even in these countries they will be scrutinised by EU regulation (1) OR 2 marks for identification and linked development e.g. • magnitude of fall in cinema sales – fall 1% (1) could just be a bad year for films (1) • unlikely to want to copy them (1) it is more the impact on their competitors' profitability they are concerned about. (1)	(8)
--	--	-----

Question Number	Indicative content	Mark
(c)	Knowledge 2, Application 2, Analysis 4 - Define price discrimination. - Application- same screening but different prices – examples from data. - Third degree price discrimination diagram.  (Source: www.economicsonline.co.uk) - If they do not discriminate and $MR=MC$ profit is $P_2MC_2Y_2X_2$. - Adults – demand more inelastic so willing to pay more and respond less as price rises. - Children – demand more responsive to change in price – elastic. - If firms splits up the market and charges different prices to each group the area of profit $PMCYX$ and $P_1MC_1Y_1X_1$ will be greater than if do not discriminate. - Profits will rise if they price discriminate depending on different groups elasticities.	(8)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1-2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	3-5	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	6-8	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
(c) continued	Evaluation 4 • Cost to administer and to ensure people buy only appropriate tickets is expensive. • Assumes they know shapes of demand curves for each group – which they may not. • Even within sub groups very different markets with different sensitivities to price – so could increase profits further with other discrimination. • Ethics/fairness of price discrimination. • Magnitude of price variations – £6.80-9.60. • Depends on proportion of earnings from tickets – other earning (popcorn etc) may be more significant. • Cutting costs may have more of an impact on increasing profits than changing price and revenue.	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/ reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Indicative content	Mark
(d)	Knowledge 2, Application 2, Analysis 2 - Define price and non-price competition. - Identify relevant price and non-price strategies suitable for Cineworld. - Application – competitors such as Odeon and Vue cinema. Benefits and limitations of each can be taken as Knowledge, Application and Analysis, or Evaluation - Price wars – lowering the price to attract customers from competition – increasing sales. - Predatory pricing – where a firm prices below AVC/AC of competitors – enables competitors to be driven out of the market and increases sales enabling the firm to drive up prices later. - Price leadership – where Cineworld sets its price first in order for competitors to follow – leading price may enable the firm to under-cut competitors for a time or push up the price as competitors follow. - Limit pricing – keep price low – to avoid firms contesting/entering market – lower price means higher output and sales, lack of competition means less fierce advertising and price reduction needed. Types of non-price competition - Advertising – this will raise awareness, interest, desire and action to increase sales of cinema tickets. - Branding – investing in the image, logo, slogan of the business – to build trust amongst customers.	(6)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no link between causes and consequences.
Level 2	3–4	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or the answer may lack balance.
Level 3	5–6	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are applied appropriately to the broad elements of the question.

Question Number	Indicative content	Mark
(d) continued	Evaluation 4 • Price wars – competitors may lower the price also meaning customers are the only ones to benefit, profit margins fall. • Predatory pricing – could get into legal trouble for trying to shut down competitor, if they have reserves they could last a long time driving down your own profits/ reserves. • Price leadership – Cineworld may increase price but competitors may not. • Limit pricing – low price means higher output but lower revenue and profit as not profit maximising. Types of non-price competition • Advertising – this will cost money, and may just encourage competitors to do the same making it more costly to remain in market. • Branding – may be a waste of funds as it may not encourage trust or brand loyalty. Other evaluation Game theory • Competitors likely to react and adjust price or advertising budgets/so could end up with both with lower price or higher costs in terms of advertising budget. • Pay off matrix may be used to show worst outcome for all. • Magnitude – depends on amount of price adjustment and advertising budget. • Prioritisation of the significance of each factor – whether pricing and non-price will be most important • Short run little change – people do not adjust to price changes straight away/long run may take time for benefits to emerge, e.g. branding.	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/ reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Indicative content	Mark
(e)	Knowledge 3, Application 3, Analysis 3 • Competition Commission (CC) concluded merger would lead to higher prices for customers in Aberdeen, Bury St Edmunds and Cambridge. • Diagram, e.g. monopoly or comparing monopoly and perfect competition. • Increased producer surplus/decreased consumer surplus – fairness. • Deadweight loss from monopolist. • Lack of productive efficiency/allocative efficiency ($P > MC$). • X-inefficiency/organisational slack.	(9)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–3	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	4–6	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	7–9	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
(e) continued	Evaluation 6 • Cineworld operates mainly large out-of-town-centre cinemas, Picturehouse's cinemas tend to be smaller cinemas located in city centres – not direct competitors. • Other indirect competitors – bowling etc. • Dynamic efficiency, increased profits may be used to innovate. • National pricing operated where it is the same for all locations. • Management monitored by head office so unlikely to develop X-inefficiency. • May revenue maximise or sales maximise due to divorce of ownership.	(6)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/ reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evidence of evaluation of alternative approaches which is unbalanced. Evaluative comments with supporting evidence/reference to context and a partially-developed chain of reasoning.
Level 3	5–6	Evaluative comments supported by relevant chain of reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Q2.

Question Number	Answer	Mark
(a)	Knowledge 2, Application 2, Analysis 1 Knowledge and analysis (3): • Definition of opportunity cost as the next best alternative foregone (1) • Governments have to pay interest (1) at the expense of other expenditure (1) • Servicing means paying back interest and minimum capital requirements (1) e.g. to prevent a default, loss of confidence, other repercussions (1) • The debt is external (1), and in this case owed by governments as they have been borrowing from abroad (1) • Use of PPF to show opportunity cost may be awarded as analysis (1) Application (2 marks for 1 point, or 1 + 1): e.g. • Debt service payments above 20% of G (1) are unsustainable (Extract D) (1) • £20billion raised 2010-2015 (Extract D) (1) • Commodity prices soaring and foreign loans available' (Extract D) (1) • 'Heavy repayment schedules at a time of low commodity prices' (Extract D) (1) • Governments have taken to 'private debt too eagerly' (Extract D) (1) • 'Median level of debt risen from 34% to 48% in 2017' (Extract D) (1) is heavy because of 'low tax base' (Extract D) (1) • High levels of poverty – half of the 26 million people (1), so many feel the effects of reduced government expenditure (Extract E) (1) • 'non-existent tuna fleet' or other hidden debt (Extract D) or corruption (1) at the expense of other government spending (1) • Opportunity costs applied to any developing country, e.g. spending on poverty alleviation, education and health spending or recent cyclone April 2019 (1). Award a maximum of 1 application mark if there is no reference to Extract D	(5)

Question Number	Answer	Mark
(b)	Knowledge 2, Application 2, Analysis 2, Evaluation 2 Knowledge/implicit understanding of two reasons why manufacturing firms stay small, (1+1) e.g. • Size of market/lack of access to export markets/low export earnings due to lack of demand • Absence of economies of scale, or insufficient incentive or ability to grow (apart from access to financial) • Problems of human capital, e.g. lack of educated workforce • Lack of infrastructure making expansion into new areas difficult, or small markets • Actions of foreign firms to foster dependency • Government or international actions to make it hard for firms to grow • Lack of TNC involvement in Mozambique/volatility of currency/capital flight • Firms want to remain close to customers- meet needs with specific goods. • Firms might be manufacturing niche products with inelastic demand and high-income elasticity • Small firms more able to manufacture and sell through selling online and have small assets. • Perfect / monopolistic competition characteristics, e.g. low barriers to entry • Non-economic factors, e.g. natural disasters, political tensions, drought • Cost of finance, cost of servicing loans, financial economies of scale and scope. Do not allow access to finance.	

	Application (1+1 or 2): e.g. • Further depreciation of the metical (Extract E) • Lack of economic stability (Extract E line 26) • Slowdown in FDI (Extract E) • Depressed global demand (Extract E) • Low levels of employment in the sector (Extract E) may imply lack of skilled workers • High interest rates (Fig. 2 and Extract E line 14) • High import costs (Extract E line 15) • Needs urgently to improve its investment environment and confidence (Extract E line 17) • Large scale emigration (Extract E) • High numbers of people 'below the poverty line' (Extract E line 6) mean the market/incomes are small • 'Economic dependence on South Africa' (Extract E) may limit prices/market power of firms.	
--	---	--

	Analysis (1+1) • Development of each point, up to 1 mark for each valid factor Evaluation (2 marks for any relevant point, two points 1+1): • The development of the gas fields (Extract E) will 'transform the economy' • Pick up in coal and electricity (Extract E) which are probably larger firms and may have impact on manufacturing • may consider whether this is because of choice or lack of opportunity • Long term 'prospects are promising' (Extract E, line 20) e.g. sustainable agreement, gas fields production in 2020s or other initiatives such as trade blocs NB Cost of finance, financial economies of scale etc are allowed. It is only ACCESS to finance e.g. unavailability of microfinance, savings gap, loss of external lenders which is excluded. NB Access to finance <i>may</i> be credited as part of the evaluation but not as KAA	(8)
--	---	-----

Question Number	Indicative content	Mark
(c)	Knowledge 2, Application 2, Analysis 4 • Microfinance meaning and role • Plugs the savings gap / Harrod-Domar model • Enables firms to be set up – fixed or start-up costs • enables firms to invest in human capital and overcome primary product dependency • Use of Figure 3 to illustrate size and importance of microfinance operations • Use of Extract F – e.g. ‘100 000 borrowers’, many new business start-ups which could not have gained finance from any other source’, ‘unfulfilled demand for microfinance’ • How borrowers benefit – small firms can be set up or expanded, allowing firms to gain capital and materials to set up businesses, provide more employment, lead to improved living standards • Borrowers lack collateral so cannot borrow from banks in the normal way • The money is in small amounts £200 to £300, paid back regularly and over a short period of time, on which basis the firm forms a business plan for which the lender will approve or advise • Microfinance allows firms to form without the stigma of aid or the dependence of FDI • Use of cost/revenue analysis to support arguments (perfect/monopolistic competitive market) • Macro analysis (AD/AS) must link back to borrowers, e.g. increased standard of living, allows firms to expand/invest NB For Level 3, answers must link to borrowers NB The answer can take the form that there are more costs than benefits as part of the KAA, using the benefits as the evaluation	(8)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	3–5	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	6–8	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
(c) continued	Evaluation 4 • Use of Figure 2 to show high base rates and Figure 3 to show average 75% APR on microfinance • Large potential for expansion (Extract F) • May encounter lack of demand as more than half of the population live below the poverty line • Weak infrastructure does not allow borrowers to access markets • Alternatives to microfinance could be considered, e.g. aid, FDI, debt relief • Reasons why microfinance can be damaging to borrowers, e.g. pressure on women (98% of borrowers), over-indebtedness, poor guidance given to borrowers, macro-finance is needed for economies of scale, people borrowing multiple times, for uses which are social not business orientated. • Large numbers of people setting up similar businesses/highly competitive e.g. food stalls, so profits tend to be low/need for dynamic efficiency • Funds from private banks very different from NGOs – banks might be more cautious, and therefore more likely to succeed, might be better advice, support from specialists, softer terms from either institution might lead to moral hazard	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Indicative content	Mark
(d)	Knowledge 4, Application 4, Analysis 8, Evaluation 9 Microeconomic influences may include: • Labour force and other demographic factors e.g. emigration of skilled/educated workers, disease, low life expectancy • Small firms with low levels of capital • Low levels of personal saving/high levels of personal debt • Primary product dependency • Volatility of commodity prices • Debt – although do not award access to credit and banking. Allow arguments based on dependency or opportunity cost, for example • Lack of infrastructure/other capital • Absence of property rights • Non-economic factors e.g. natural disasters, social problems • Joint ventures with global companies Macroeconomic influences may include: • Trade liberalisation – may refer to tariffs or trade agreements • Role of FDI e.g. the tuna fleet cover-up dries up FDI • Government policy failure, e.g. weak expansion in fiscal policy, high interest rates, lack of subsidies, privatisation, interventionist strategies, e.g. management of exchange rate, buffer stocks • Actions of other international institutions e.g. IMF or NGOs • Macroeconomic stability, e.g. rate of inflation (might refer to Figure 2), rate of economic growth, exchange rate (metical at a 'new low')	

	Possible evaluation points include: • Degree to which the factors are inevitable • Signs of improvements in passages • Some factors are temporary, e.g. fall in commodity prices such as coal and drought affecting production and exports to other countries within Africa NB Do not award KAA for arguments based on ACCESS TO credit and banking, although this approach is permitted as part of the evaluation NB for a Level 4 response there must be micro and macro factors (s). There must be reference to both growth and development for Level 4	
--	---	--

	PPD/ Harrod-Domar/ debt/ aid/ debt relief/ cost of credit/ non-economic factors/currency issues / competitiveness index can be used as micro or macro.	(25)
--	--	-------------

Knowledge, application and analysis

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–4	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	5–8	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or superficial, two stage chains of reasoning only.
Level 3	9–12	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to apply economic concepts and relate them directly to the broad elements of the question with evidence integrated into the answer. Analysis is clear and coherent, although it may lack balance. Chains of reasoning are developed but the answer may lack balance.
Level 4	13–16	Demonstrates precise knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using appropriate examples. Analysis is relevant and focused with evidence fully and reliably integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems covering both microeconomic and macroeconomic factors. The answer demonstrates logical and coherent chains of reasoning.

Evaluation		
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–3	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	4–6	Evidence of evaluation of alternative approaches which is unbalanced leading to unsubstantiated judgements. Evaluative comments with supporting evidence/reference to context and a partially-developed chain of reasoning.
Level 3	7–9	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and is critical of the evidence provided and/or the assumptions underlying the analysis enabling informed judgements to be made.

Question Number	Indicative content	Mark
(e)	Knowledge 4, Application 4, Analysis 8 Evaluation 9 Microeconomic effects may include: • On people with debt (better off) and savings (worse off) • On people with fixed incomes – may refer to falling real incomes • On firms' profits, e.g. that face rising costs and if they cannot raise prices they will face falling profits, or falling sales as consumers delay purchases. This might be illustrated with cost/revenue diagrams. • On firms' costs if they face rises in interest rates as a policy corollary of high inflation, which might lead to lower profits. This might be illustrated with cost/revenue diagrams. • Opportunity cost, e.g. effects on a government's spending if costs of servicing debts fall • Effect on labour markets e.g. people might work more hours to cover increased cost of living NB do not award fall in profits or revenue or rise in costs unless a valid chain of reasoning is given Macroeconomic effects may include: • International competitiveness and balance of payments, between African countries and with the rest of the world. Exports likely to fall and imports likely to rise • Distribution of income and wealth • Confidence and investment in financial markets • Policy responses, e.g. rises in interest rates and effects on AD • Shift in AS and/or AD may be used as part of the analysis • High inflation might deter Investment and FDI	

	NB do not award rise in unemployment/fall in growth unless a valid chain of reasoning is given Possible evaluation points include that the effect depends on: • Whether wages rise in line with inflation • The degree of inflation, and the policy and international responses. • The PED of countries buying the African exports • The PED of importing countries as imports become relatively cheap	
--	--	--

	• Whether African countries are trading with each other the effects of inflation may be cancelled out e.g. use of Figure 2 to show neighbouring countries with higher inflation rates • Whether asset prices rise as to the redistributive impact • Depends on whether this is a long-term inflation problem- could be short term e.g. linked to commodity price rises. Only a problem if it is sustained. • The figures are in one month in July 2017 and may not reflect inflation story for full year. Time series data may be more useful. • Depends on the type of inflation – e.g. cost push or demand pull. • Impact on exchange rates e.g. higher inflation may erode the value of the currency. This might cancel out the impact on competitiveness NB for a Level 4 answer there must be reference to the context of African countries (not just one) NB for a Level 4 response there must be micro and macro effect (s). Costs/ shift in PPF/ currency/labour markets/competitiveness etc. can be used as micro or macro.	(25)
--	---	------

Knowledge, application and analysis		
Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–4	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	5–8	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or superficial, two stage chains of reasoning only.
Level 3	9–12	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to apply economic concepts and relate them directly to the broad elements of the question with evidence integrated into the answer. Analysis is clear and coherent, although it may lack balance. Chains of reasoning are developed but the answer may lack balance.
Level 4	13–16	Demonstrates precise knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using appropriate examples. Analysis is relevant and focused with evidence fully and reliably integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems covering both microeconomic and macroeconomic factors. The answer demonstrates logical and coherent chains of reasoning.

Evaluation		
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–3	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	4–6	Evidence of evaluation of alternative approaches which is unbalanced leading to unsubstantiated judgements. Evaluative comments with supporting evidence/reference to context and a partially-developed chain of reasoning.
Level 3	7–9	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and is critical of the evidence provided and/or the assumptions underlying the analysis enabling informed judgements to be made.

Q3.

Question Number	Answer	Mark
(a)	Knowledge 1, Application 2, Analysis 2 Knowledge and Analysis: (up to 3 marks) • Understanding of a positive statement e.g. statement of fact that can be tested (1) • Understanding of a normative statement e.g. statement containing a value judgement (1) Further analysis of the difference (1) e.g. • a positive statement is not linked to political viewpoint • these normative statement represents the value judgement of the Prime Minister/current political party • objective v subjective • Scientific method Application: up to 2 marks 1 for positive and 1 for normative for each example from the extract Normative example (up to 1 mark) • the regulator 'should' limit the standard variable tariff (1) • offer fairer prices for customers who are paying too much (1) • 'a price cap will not be good for consumers' (1) • The market is broken (1) Positive example (up to 1 mark) • Energy bills of 11 million households will be capped (1) • Save households up to £100 (1)	(5)

Question Number	Answer	Mark
(b)	Knowledge 2, Analysis 2, Application 2, Evaluation 2 Knowledge/understanding: 2 marks for identification of two likely benefits to the consumers (1+1) e.g. • Lower prices • Improved product quality • More innovative products • Better customer service • Better bundles/packages/choice Analysis: 1 mark for linked explanation of each identified benefit (1+1) e.g. • A benefit to the consumer is cheaper prices (1K) as BT has greater purchasing power (economies of scale) OR consumers can buy more goods/services with their income OR increased consumer surplus (1An) • A benefit to the consumer is the greater availability of bundles/packages (1K) this therefore means that they can spend less overall when buying products together rather than individually on separate contracts(1An)	

	Application: 2 marks for reference the context of the BT and EE takeover (1+1), e.g. • Multi-brand strategy (1) • Mix of BT, EE and Plusnet services (1) • Greater value bundles of services (1) • Compete for their business (1) • Controlling 35% of market share (1) Evaluation: 2 marks for two evaluative comments, OR 2 marks for identification and linked development of one evaluative comment e.g. • Potential problems to the consumer ◦ Higher prices in the LR due to diseconomies/monopoly power/x-inefficiency ◦ Lack of choice as control 35% of market ◦ Restriction of new competitors ◦ Slowed pace of technology ◦ Poor customer service • Depends on the actions and behaviour of rival firms • Depends on the extent to which cost saving measures are passed on to the consumer • Depends on the degree of future regulation within the industry	(8)
--	---	-----

Question Number	Indicative content	Mark
(c)	Knowledge 2, Application 2, Analysis 2 Information gaps as main cause of consumers failing to switch ➤ Consumers lack market information on the price of their landline bill in relation to other providers ➤ Main target audience (the elderly) lacks the knowledge to shop around online and use price comparison sites ➤ Switch to online billing and direct debit payments means many households are unaware ➤ Automatic price changes made by BT ➤ Hard to compare prices as all bundles comprise of different services ➤ Lack of awareness of competitor prices and packages	

	Irrational behaviour as main cause of consumers failing to switch ➤ Computation issues e.g. consumers do not understand their pricing structure ➤ Habitual behaviour/status quo bias/brand loyalty e.g. consumers may have a tendency to purchase the same service over time ➤ Consumers do not have the time to shop around or look for better deals ➤ Consumers want to avoid the disruption of changing provider ➤ Strong brand of BT leading to an inelastic demand Other factors could be causing this: ➤ Misleading advertising or price plans ➤ Lack of provision in all areas e.g. fibre optic or bundles ➤ Tie in contracts & automatic renewals ➤ Information overload ➤ Size of savings may not be significant enough to go through switching ➤ Line quality may vary so not similar packages/non-price considerations make BT offer the best. NB For Level 3 response candidates need at least two reasons but are not required to use both 'information gaps' and 'irrational behaviour'. NB There may be overlap between information gaps and irrational behaviour as reasons.	(6)
--	--	-----

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no link between causes and consequences.
Level 2	3–4	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or the answer may lack balance.
Level 3	5–6	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are applied appropriately to the broad elements of the question.

Question Number	Indicative content	Mark
(c) continued	Evaluation 4 • Counter arguments made to the reasons raised • Significance of the reasons provided • Consideration of whether it is rational to assume that consumers seek to maximise utility in allocating their expenditure • Long run information gaps may narrow and irrational behaviour may reduce e.g. improved price plan information & actions of the regulator	(4)
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/ reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Indicative content	Mark
(d)	Knowledge 2, Application 2, Analysis 4 BT profit levels have risen to £3.03 billion • Higher revenue due to, e.g.: - Higher rental price for landline - Price increases of 15% - Broadband calls up in price - Customers paying a higher price for setting up landline with BT - Integration with EE increasing mobile revenues - Increase in market share to 35% - Inelastic PED subject to monopoly abuse • Lower costs - Approximately 27% fall in the cost of providing the landline service - Economies of scale - Fall in fixed costs of providing extensive 'landline' network - Dynamic efficiency gains/synergy/patents acquired from merger - Fall in variable cost • Other potential reasons explained: - Exploitation of certain consumer groups - Effective use of price discrimination - Collusion with other landline providers	

	Costs and revenue diagram showing: - Original profit maximising output level - Outward shift in AR and MR - And/or – fall in AC and MC - And/or – fall in AC if FC lower - And/or Changes shown on Monopoly diagram e.g. from limit pricing to profit maximisation - Original SNP and larger new SNP area NB – For Level 3 an accurate costs and revenue diagram must be included.	(8)
--	--	-----

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	3–5	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	6–8	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
(d) continued	Evaluation 4 • Profits levels are likely to fall in the future due to the actions of the regulator and prices falling • Profits levels are likely to fall in the future as more competition enters the markets • Relative significance of points • Significance - both factors are working together to increase the extent of their profits • Not possible to say for certain due to a lack of information and data • Magnitude – 27% fall in costs likely to have a significant contribution.	(4)
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Indicative content	Mark
(e)	Knowledge 3, Application 3, Analysis 3 Methods of government intervention include: • Price regulation • Profit regulation • Renationalisation of industry • Performance targets • Quality standards • Providing information to enable switching • Policies to enhance competition between firms e.g. start-up grants • Policies to improve contestability and help small firms • Work of the Competition & Markets Authority regarding abuse of dominant position, anti-competitive agreements or intervening on mergers. NB for a Level 3 response there must be reference to the context of utilities. (Do not award Level 3 if no reference to the data provided or utility industries) NB for a Level 3 response there must be reference to more than one policy and the policy must refer to how it protects consumers. NB for a Level 3 response a diagram is not required but may include for example	

	Improved allocative efficiency for consumers, surrogate for competition. 	(9)
--	---	-----

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–3	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	4–6	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	7–9	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
(e) continued	Evaluation 6 • Criticisms of the likely effectiveness of the policies • Awareness of the problems surrounding their implementation • Recognition that a combinations of approaches may be needed • Different industries may need differing approaches • SR v LR implications • Regulatory capture • Asymmetric information • Regulatory lag • Irrational consumer behaviour • Unintended consequences of government failure e.g lack of innovation, price increases, deteriorating customer service. NB for a Level 3 response there must be reference to the context of utilities.	(6)
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evidence of evaluation of alternative approaches which is unbalanced. Evaluative comments with supporting evidence/reference to context and a partially-developed chain of reasoning.
Level 3	5–6	Evaluative comments supported by relevant chain of reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Q4.

Question Number	Answer	Mark
(a)	Knowledge 2, Application 2, Analysis 1 Knowledge and analysis 3 marks for identifying market structure and relevant features. Points might include: • Monopolistic competition or highly competitive (1) • Many small sellers in the market (1) • Low price setting power (1) • Firms sell differentiated goods (1) • Normal profit/low profit margins as a sign (1) of low barriers to entry/exit (1) • Allow up to 2 marks for diagrammatic analysis Application: 2 marks for data (1+1 or 2): point might include: • there are many firms 10 000 to 20 000 (1) • cheap, low skill labour are possibly migrants (1) • low level of capital required (1) • everyone paying the same £5 (1) • some offering inside and out washes (1) / similar car washing at each provider (1) • Availability of cheap premises make market entry easier (1)	(5)

Question Number	Answer	Mark
(b)	Knowledge 2, Application 2, Analysis 2, Evaluation 2 Knowledge/ implicit understanding: (1+1) marks for two reasons and explanation e.g. • HCWs are inferior goods if demand rises when incomes fall • HCWs at £5 are a very small percentage of consumer income so they might be seen as essential or basic goods • Other factors affect demand apart from income, for e.g. availability and price of substitutes (automatic car washes [might be normal/luxury good] or car washing equipment), working patterns Application: (2 marks for any relevant point, or two points 1 +1). Points might include: • Incomes are not keeping up with inflation so real incomes are falling • HCWs at £5 are a very small percentage of consumer income so they might be seen as essential or basic goods. • Increased demand when people have lower incomes – high level of utility at small expense, Extract A paragraph 2 • Extract B: there is a decrease in the availability of automatic car washes as independent petrol retailers go out of business. • Increased number of sites and rents have fallen (Extract A paragraph 3)	

	Analysis (1 + 1): • Linked development of the two points made • Maybe shown by diagrammatic analysis Evaluation: (2 marks for any relevant point, two points 1 +1). Points might include: • Subjective happiness is yielded from an HCW, implying that it is rational to use an HCW/it is not rational as washing the car at home is cheaper when incomes fall • Incomes have not been falling over the whole period, so it is more likely that as incomes rise people are buying a HCW as a YED is low (small percentage of income) • Regional or demographic changes in incomes	(8)
--	--	------------

Question Number	Indicative content	Mark
(c)	Knowledge 2, Application 2, Analysis 4 Knowledge/implicit understanding: Points might include: - Increased labour supply – workers willing to take low-paid jobs - Arguments also allowed that since the UK left the EU, many workers are leaving – question does not specify immigration or emigration - Increased demand from increased UK population also allowed as an approach Application: - Immigrants the main employees at HCWs and similar labour intensive firms (Extract A) - Implication in EU that increased immigration (Extract A paragraph 4) has caused supply to increase and therefore wages half of minimum wage (Ext A last paragraph) - HCW often a first job while the migrant's language improves on arrival in the UK (Ext A) - Following UK leaving the EU many low skilled labour may leave - Workers are not able to migrate as wages are not high enough in sector to be able to migrate to post UK leaving the EU	

	Analysis: - Labour market diagram showing increase in the supply of labour - NMW diagram showing excess supply of labour at the wage floor - Allow decrease in supply, e.g. since the UK leaving the EU - Allow backward bending supply of labour - Allow monopsony diagrams (although not required) - Some segments require more skilled workers and not suit low skilled migrant workers, e.g. valeting - Reference to any industry that relies on migrant workers, e.g. hospitality, nursing, construction NB if no valid diagram or reference to an industry, then award a maximum of Level 2 KAA	(8)
--	---	-----

Diagram, shift in demand and/or supply, or minimum wage e.g.

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1-2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	3-5	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	6-8	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
(c) continued	Evaluation 4 • Impact of UK leaving the EU, Global Health Crisis etc. might put immigration figures into negative, and wages and conditions might improve • Depends on monopsony power • Evidence suggests there is not exploitation, or there is not enough evidence • Some firms are charging a fair wage • Other changes in the pipeline • The size of the changes in migration will dictate the impact on labour market • The ability of workers to move to other sectors/ speed language developed will determine impact on labour market • Within HCW there are sub-markets - some specialise in luxury vehicles - others are mobile operators who visit home - each will be affected differently	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1-2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3-4	Evaluative comments supported by relevant reasoning and appropriate reference to the context. Evaluation recognises different viewpoints and is critical of the evidence provided and/or the assumptions underlying the analysis enabling informed judgements to be made.

Question Number	Indicative content	Mark
(d)	Knowledge 4, Application 4, Analysis 8, Evaluation 9 16 marks for KAA, for causes of the number of firms in an industry to change. Microeconomic causes may include: • nationalisation • privatisation • contestability • market power • economies of scale – natural monopoly • regulation and deregulation • oligopoly behaviour • barriers to entry e.g. factors linked to demand- tastes- preference for HCW over automatic, income, availability of substitutes- decline in automatics	

	Macroeconomic causes may include: • economic growth – e.g. a growing market means more firms will enter • trade patterns • level of protectionism • government policies e.g. supply side policies • TNCs and FDI • unemployment (especially given recent events) • inflation- if inflation is high, costs rise and if unable to increase prices, then firms may exit the market • Level of environmental protection- adds to the costs and may reduce the number of firms. • Exchange rates - if appreciated - costs to import lower and export higher - exporters may exit the market • Relative poverty high and rising - more demand low costs HCW increasing demand and market size - more firms NB for a Level 4 response there must be micro and macro cause(s). Foreign direct investment, role of TNCs, or regulation could be seen micro or macroeconomics NB for a Level 4 response there must be reference to an industry	
--	--	--

	9 marks for evaluation – points might include: • Depends on the nature of the business. Another industry could be used as a contrast, e.g. a capital intensive industry • Depends on the LRAC and the minimum efficient scale in the current situation • Changes over time – barriers to entry or exit are likely to change e.g. in the face of new technology in car wash industry or other industry • Exchange rates go up and down so could equally depreciate • Environmental protection may create more demand as it is a more ethical service and not cause the number of firms to fall	(25)
--	--	------

Knowledge, application and analysis		
Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–4	Displays ability to apply knowledge in context but will focus on small range of elements. Demonstrates understanding by identifying relevant information. Demonstrates knowledge and understanding of terms, concepts, theories and models.
Level 2	5–8	Shows ability to apply economic ideas and relate them to economic problems in context. Displays knowledge and understanding of economic principles, concepts and theories to make limited analysis or narrow analysis.
Level 3	9–12	Analysis is clear and coherent with evidence well integrated, although may focus on some of the broad elements of the question more than others. Shows ability to apply economic ideas and relate them directly to the broad elements in the question.
Level 4	13–16	Analysis is relevant, clear and coherent with evidence fully and reliably integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems covering both microeconomic and macroeconomic effects. A clear understanding of economic principles, concepts, theories and arguments.

Evaluation		
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–3	Identification of evaluative comments without explanation.
Level 2	4–6	Evaluative comments with limited explanations. Evidence of evaluation of alternative approaches which is generic or unbalanced leading to limited judgements.
Level 3	7–9	Evaluative comments supported by relevant reasoning and appropriate reference to the context. Evaluation recognises different viewpoints and is critical of the evidence provided and/or the assumptions underlying the analysis enabling informed judgements to be made.

Question Number	Indicative content	Mark
(e)	Knowledge 4, Application 4, Analysis 8, Evaluation 9 16 marks for KAA, for effects of increased government intervention. Microeconomic effects may include: • Minimum price, living wage enforced, planning issues, tax, health and safety • Rise in wages (if wage floors introduced) will have a large impact on costs. Might be shown on increasing NMW diagram • Effect on price of car washes – consumer surplus falls, output falls, price increases • Impact on quantity of labour/marginal revenue productivity • Impact on productivity • Diagram to show the effect of the intervention approach, e.g. of minimum price as solution to market failure • Price of a car wash might be passed on to higher wages	

	Macroeconomic effects may include: • Income equality improvements – may use Gini coefficient or Lorenz curve • Prices rise – inflationary effects • reduction in levels of poverty • effects on growth – inflexibility in markets can reduce I or FDI • might improve environmental standards • Reduced employment NB for a Level 4 response there must be micro and macro effect (s). Employment or welfare issues could be seen as micro or macro, for example, can be used as either micro or macroeconomics NB for a Level 4 response there must be reference to an industry	
--	--	--

	9 marks for evaluation – points might include: • Government failure, e.g. regulatory capture, asymmetric information • depends on impact of other events such as UK leaving the EU, high unemployment from recent Global Health Crisis • effect on workforce of employment regulation depends on elasticity for demand for labour, and degree with which it can be replaced with capital • depends on PED of HCW market as a whole • consumers might also have increases in wages • some firms will face decreased demand and go out of business. Loss of jobs and other economic activity • depends on the PED and PES in factor market and product market as a whole • Wash Mark Certificates not government regulation may have more of an impact in improving quality and conditions for workers and reducing pollution than government action	(25)
--	--	------

Knowledge, application and analysis		
Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–4	Displays ability to apply knowledge in context but will focus on small range of elements. Demonstrates understanding by identifying relevant information. Demonstrates knowledge and understanding of terms, concepts, theories and models.
Level 2	5–8	Shows ability to apply economic ideas and relate them to economic problems in context. Displays knowledge and understanding of economic principles, concepts and theories to make limited analysis or narrow analysis.
Level 3	9–12	Analysis is clear and coherent with evidence well integrated, although may focus on some of the broad elements of the question more than others. Shows ability to apply economic ideas and relate them directly to the broad elements in the question.
Level 4	13–16	Analysis is relevant, clear and coherent with evidence fully and reliably integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems covering both microeconomic and macroeconomic effects. A clear understanding of economic principles, concepts, theories and arguments.

Evaluation		
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–3	Identification of evaluative comments without explanation.
Level 2	4–6	Evaluative comments with limited explanations. Evidence of evaluation of alternative approaches which is generic or unbalanced leading to limited judgements.
Level 3	7–9	Evaluative comments supported by relevant reasoning and appropriate reference to the context. Evaluation recognises different viewpoints and is critical of the evidence provided and/or the assumptions underlying the analysis enabling informed judgements to be made.

Q5.

Question Number	Answer	Mark
(a)	Knowledge 2, Application 2, Analysis 1 Knowledge and analysis Up to 3 marks for: - the meaning of externalities, e.g. effect on third party, outside the transaction, difference between social cost and private cost (1). Points might include: - use of plastic which is hard to recycle/other single use plastic arguments (1) - HFSS food can cause obesity and have third party effects (1) - more congestion/air pollution from food deliveries (1) (positive) externality due to rise in productivity generated by cash rich, time poor professionals might allow people do impact third parties positively (1) Application: 2 marks for data (1+1 or 2): 1.4 billion containers (1) or other plastic items to allow food to travel safely e.g. heat retention (1) - over-consumption / order more food (1) e.g. impact on other NHS users (1) - HFSS food (1) - falling profit margins (1) or increased competition in food delivery might mean wages fall so fewer wider macro benefits (1) - don't even have to get up/lack of exercise of consumers ordering from their sofa (1) NB 2 marks may be awarded for a diagram e.g. a negative externalities in production of food that has to be delivered	(5)

Question Number	Answer	Mark
(b)	Knowledge 2, Application 2, Analysis 2, Evaluation 2 Knowledge/implicit understanding: (1+1) marks e.g. • demand is price inelastic means that the percentage change in price causes a smaller percentage change in quantity demanded • demand is income elastic means that percentage change in income causes a greater percentage change in demand Application: (1+1 or 2) e.g. • food delivery firms' charge of £5 is a very small percentage of consumer income so they might be seen as essential or basic goods (Ext B line 5) • three dominant firms Just Eat, Uber Eats and Deliveroo (Ext B line 2) • The food delivery industry has boomed in recent years (Ext B line 2) • cash rich, time poor (Ext B line 7) • income growth prior to 2020 meant delivery has boomed • HFSS addiction/habit forming • Convenient mobile app, so PED inelastic • 5 times more expensive than cooking at home Analysis: (1+1) development of each type of elasticity, e.g. • if demand is price inelastic then revenue will rise for the firm when it raises price • habit forming behaviour so PED inelastic • few close substitutes so PED inelastic • small part of overall consumer spending so PED inelastic • food delivery services are a very small percentage of consumer income so they might be seen as essential or basic goods • if food delivery is a luxury the demand likely to be income elastic, e.g. then the firms will benefit in times of economic growth, but lose demand in a recession • if food delivery is a treat in an economic downturn then it is an inferior good NB up to 2 marks may be awarded for diagram(s) (1+1)	

	Evaluation: (2 marks for any relevant point, or two points 1 +1) • the 30% of prices paid by restaurants is not seen by the consumer • depends on geographical areas e.g. rural vs urban areas. • the worldwide health crisis might have caused distortions in the data • third-party food delivery firms are inferior goods if demand rises when incomes fall • other factors affect demand apart from income, e.g., availability of substitutes (eating in restaurants is impossible in global health crisis) • discussion of normal vs inferior question e.g. compared to eating in a restaurant or cooking at home • income elastic vs. inelastic e.g. demand for third-party food delivery is price elastic for some income groups when incomes fall as it takes up a larger percentage of income	(8)
--	--	-----

Question Number	Indicative content	Mark
(c)	Knowledge 2, Application 2, Analysis 4 Points might include: • integration includes horizontal/vertical/ conglomerate joining of firms • leads to economies of scale • increased market share • removal of competition • increased monopoly power • international rivals can avoid taxes • prices higher for consumers • reduced choice for restaurants and consumers • monopsony power over restaurants • technical advantages of vertical integration • vertical power over firms can leave other firms with high barriers to entry • Just Eat has bought out rivals e.g. merger between Just Eat and Takeaway.com • Amazon has partially bought Deliveroo (16% so far) which may have saved it, and/or improved it on the tech side NB effects might include more than one types of economies of scale, or other combined analysis. Award diagrammatic analysis e.g. economies of scale LRAC	(8)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	3–5	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.

Level 3	6–8	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.
---------	-----	---

Question Number	Indicative content	Mark
(c) continued	Evaluation 4 • mergers might be necessary to ensure the survival of firms (e.g. Deliveroo case) • further mergers might be limited by the CMA • supernormal profits might lead to lower prices, better technology and/or a more consumer-led market • prices may fall due to fall in average costs due to e.g. economies of scale • diseconomies of scale	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to the context. Evaluation recognises different viewpoints and is critical of the evidence provided and/or the assumptions underlying the analysis enabling informed judgements to be made.

Question Number	Indicative content	Mark
(d)	Knowledge 4, Application 4, Analysis 8, Evaluation 9 Microeconomic effects of depreciation may include: • higher cost of imports of food and therefore higher cost of production for hospitality sector • lower profits for firms in hospitality • higher prices of food for consumers • consumers have lower standards of living if they are on fixed incomes/ • falling real incomes so demand for restaurant meals and food delivery services might shift left • workers have higher incomes if working in exporting firms in other industries, so might use more delivery services • restaurants might begin to use more locally produced food Macroeconomic effects of depreciation may include: • capital in-flows, e.g. benefits to multinational firms such as Just Eat for investment in the US using other currencies/ AD and/or LRAS shift out • cost push inflation/SRAS shifts in • more injections and fewer withdrawals leading to rise in AD and multiplier effect • increased employment • incentive to use transfer pricing • UK tourism might be boosted by depreciation which would improve local restaurants NB for a Level 4 response there must be micro and macro effects and use of data with reference to restaurants or other food delivery services. Higher costs, changes in competitiveness, environmental changes could be seen as micro or macro, for example, can be used as either micro or macroeconomics. NB Effects in KAA could be used as evaluation and vice-versa.	(25)

	9 marks for evaluation – points might include: • depends on the nature of the restaurant. Some try to use locally sourced ingredients • the pound has recovered significantly since 2016 • food costs are a small cost relative to other costs, e.g. rent and delivery • some restaurants are specialised in UK food so cost effect very low • other factors are more important, e.g. the heavy fiscal spending in response to the global health crisis • other factors determining capital inflows • relative depreciation or trade weighting of other currencies • offsetting costs with altering portion sizes or changing menu options • impact on tourism small relative to the increase in the production of food • regional differences with the UK e.g. whether there is a local food supply option • Marshall Lerner • J-curve	
--	---	--

Knowledge, application and analysis		
Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–4	Displays ability to apply knowledge in context but will focus on small range of elements. Demonstrates understanding by identifying relevant information. Demonstrates knowledge and understanding of terms, concepts, theories and models.
Level 2	5–8	Shows ability to apply economic ideas and relate them to economic problems in context. Displays knowledge and understanding of economic principles, concepts and theories to make limited analysis or narrow analysis.
Level 3	9–12	Analysis is clear and coherent with evidence well integrated, although may focus on some of the broad elements of the question more than others. Shows ability to apply economic ideas and relate them directly to the broad elements in the question.
Level 4	13–16	Analysis is relevant, clear and coherent with evidence fully and reliably integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems covering both microeconomic and macroeconomic effects. A clear understanding of economic principles, concepts, theories and arguments.

Evaluation		
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–3	Identification of evaluative comments without explanation.
Level 2	4–6	Evaluative comments with limited explanations. Evidence of evaluation of alternative approaches which is generic or unbalanced leading to limited judgements.
Level 3	7–9	Evaluative comments supported by relevant reasoning and appropriate reference to the context. Evaluation recognises different viewpoints and is critical of the evidence provided and/or the assumptions underlying the analysis enabling informed judgements to be made.

Question Number	Indicative content	Mark
(e)	Knowledge 4, Application 4, Analysis 8, Evaluation 9 16 marks for KAA, for effects of increased minimum wage Microeconomic effects may include: • rise in wages will benefit very low paid workers. Might be shown on increasing NMW diagram • effect on cost to firms e.g. reduced profit margins. Might be shown on a cost and revenue diagram. • excess supply of hospitality workers • effect on prices consumer surplus falls, output falls, price increases • impact on quantity of labour demanded/contraction of labour demand • impact on productivity • inefficient resource allocation due to distortion of price mechanism Macroeconomic effects may include: • income equality improvements – may use Gini/Lorenz • prices rise – inflationary effects • reduction in relative poverty • AD: increase in consumption as incomes increase/fall in investment as profits fall • SRAS: cost-push • LRAS: if investment falls, then LRAS shifts in • reduced employment • higher income tax revenue • lower unemployment related benefits NB for a Level 4 response there must be micro and macro effect (s) and use of data with reference to restaurants or other food delivery services. Employment or welfare issues could be seen as micro or macro, for example, can be used as either micro or macroeconomics. NB Effects in KAA could be used as evaluation and vice-versa.	(25)

	9 marks for evaluation – points might include: • effect on firms depends on how much wage costs are as a proportion of overall costs • impact on real output depends on level of spare capacity/elasticity of LRAS/magnitude of multiplier • effect on workforce of employment regulation depends on elasticity for demand for labour, and degree with which it can be replaced with capital • depends on PED of food delivery firm market as a whole • consumers might also have increases in wages so profits might not fall • some firms will face decreased demand and go out of business. Loss of jobs and other economic activity • depends on the PED and PES in factor market and product market as a whole • LRAS might rise as economically inactive workers enter labour force to look for jobs • higher tax revenue may not occur if unemployment increases or investment decreases • higher unemployment related benefits if unemployment increase • productivity/motivation arguments

Evaluation		
Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–3	Identification of evaluative comments without explanation.
Level 2	4–6	Evaluative comments with limited explanations. Evidence of evaluation of alternative approaches which is generic or unbalanced leading to limited judgements.
Level 3	7–9	Evaluative comments supported by relevant reasoning and appropriate reference to the context. Evaluation recognises different viewpoints and is critical of the evidence provided and/or the assumptions underlying the analysis enabling informed judgements to be made.

Q6.

Question Number	Answer	Mark
(a)	Analysis 1 The only correct answer is C A is not correct because the external economies of scale being the most likely reason would indicate that the market contains mostly small firms in a perfectly competitive market which is not evident in the stem. B is not correct because companies merging are more likely to benefit from internal economies of scale D is not correct because a demerger will usually reduce market share and it could be argued in this case that the two businesses are unrelated.	(1)

Question Number	Answer	Mark
(b)	Knowledge 2 Application 2 Profit = TR – TC or TC = TR – Profit OR 72.8 million – 14.4 million (1) Calculation of profit in 2016 17.5 million/1.215 = 14.4 million (1) Calculation of total revenue in 2016 75.8 million/1.041 = 72.8 million (1) Award full marks for the answer = £58.4 million NB – simply stating 58.4 million is 4 marks simply stating 58.4 is 3 marks	(4)

Q7.

Question Number	Answer	Mark
(a)	Knowledge 1, Application 2, Analysis 2 Knowledge and Analysis: up to 3 marks for e.g. - Staffing levels fall (1) - Diminishing marginal productivity means for an additional unit of labour the additional increase in productivity declines (1) so the additional cost of hiring more labour (1) needs to be set against the additional productivity gained (1) - As marginal productivity declines/diminishing returns set in (1) marginal cost increases at a faster rate (1) given labour is homogenous (1) - In the short run labour is variable (1) all other factors of production are held constant (1) so an additional unit of labour will result in less additional output (1) - An additional unit of labour results in: marginal product declines (1) average product declines (1) total product increases at a slower rate (1) total cost rises at a faster rate (1) marginal cost increases (1) average cost rises (1) Application: up to 2 marks for e.g. - lower marginal productivity of an additional crew member (1) explains why American Airlines are reducing staffing levels (1) - The first cabin crew member serves 50 passengers, the second serves 60 additional passengers, the third serves 30 more, the fourth serves 20 (1+1) - The number of additional meals served will decline per additional crew member (1) as crew members start to get in each other's way (1) - The available space on the plane is fixed (1) and seating/trolley/meals/doors available (1) - Lower cost per passenger (1) cheaper tickets (1)	(5)

Question Number	Answer	Mark
(b)	Knowledge 2, Analysis 2, Application 2, Evaluation 2 Knowledge/understanding: 2 marks (1+1) e.g. • Social optimum is when $MSC = MSB$ (1) • Social optimum position moves right (1) • Market equilibrium output (e.g. MO) position identified (1) • Downward sloping MSB (1) • $MSC = MPC + MEC$ (1)	

	Analysis: 1 mark for linked explanation of each identified benefit (1+1) e.g. • Third party effects are lower (1) so external costs are lower/MEC falls (gi to ki) (1) • MSC shifts/skews right (1) showing new social optimum position (MSB=MSC) (1) • Welfare loss falls (1) from ghi to kji (1) Application: 2 marks for reference to Extract B e.g. • Thomas Cook airline emissions are lower/switch fuel types/new engines (1) • In 2018 Thomas Cook Group Airline was included in the top 10 of the world's most fuel-efficient airline (1) • Lower insurance bills/clean up bills for companies/households at risk of flood damage/storms (1) loss of cattle/crops due to drought declines (1) • CO₂ emissions per passenger declines (1) quantity of flights increases (1)	
--	--	--

	NB These application points may be annotated on the diagram. Evaluation: 2 marks for two evaluative comments, OR 2 marks for identification and linked development of one evaluative comment e.g. • Difficulty in measuring size of negative externality (1) third party effects (1) • CO₂ emissions from travel agents, hotels and holiday activities increase/remain high (1+1) • Computational problems in measuring CO₂ emissions from planes (1) faulty industry data (1)	(8)
--	--	-----

Question Number	Indicative content	Mark
(c)	Knowledge 2, Application 2, Analysis 2 Case for principal agent problem being significant. Conflict of interest between the principal (shareholder) and the agent (CEOs/directors/managers) creates problems for Thomas Cook: • Moral hazard – no consequences for the failings of management results in high-risk behaviour • Chief Executive incentivised by £500 000 bonus and £8.5 million salary possibly linked to sales or market share rather than the long-term profitability of Thomas Cook • To increase sales or market share the Chief Executive may have focussed on mergers with other Travel businesses, price wars with competitors or investing in buying new hotels and planes rather than keeping costs low and paying off debts • Chief Executive may have prioritised a greener image by reducing emissions or better pay to avoid pilots striking and sought to satisfy shareholders instead reducing the long-term profitability of Thomas Cook	(6)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no link between causes and consequences.
Level 2	3–4	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or the answer may lack balance.
Level 3	5–6	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are applied appropriately to the broad elements of the question.

Question Number	Indicative content	Mark
(c) continued	Evaluation 4 Case against ‘principal agent problem’ - Employee share-ownership schemes address the problem. £4m of the CEO's £8.5m earning is in shares – so as an employee he is motivated by profit maximisation, bringing him in-line with shareholders. His shares are now worthless - CEO worked “exhaustively” to rescue Thomas Cook and create a long-term strategy. By owning planes and hotels they would have assets and not borrow to rent. In the long-run Thomas Cook could have moved its sales more on-line - Shareholders have lost capital value but the CEO has lost his job, earnings and his reputation - Shareholders can hold the CEO accountable at their AGM, reject pay and bonus awards and place the CEO on a short-term contract to avoid the long-term contract short-term gain problem - Other factors that caused closure – fuel prices, competition.	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/ reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Indicative content	Mark
(d)	Knowledge 2, Application 2, Analysis 4 Case for subsidy: • Subsidy is financial aid, grant • In long run required more to cover AC • Subsidy may have lowered AC, may be shown as shift on diagram • Benefit of subsidy to producer may cover their AVC in short-run or AC in long-run. • Avoid government rescuing 600 000 travellers • Avoid government paying benefits to up to 21 000 employees and those losing jobs in related industries e.g. hotels • Subsidy may have leveraged help from banks and shareholders • Thomas Cook may have recovered - Package holidays may have come back into fashion – aging population. Recession may have seen a rise in demand for package holidays as an inferior good, YED negative • Diagram may be used, for example: 	

	OR Incidence of a Subsidy  NB a diagram is not required NB case against subsidy may be seen as KAA and case for as evaluation or vice versa.	(8)
--	--	-----

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1-2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	3-5	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	6-8	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
(d) continued	Evaluation 4 Case against subsidy Lack of finance • £150 million not enough - £1.5 billion loss. • Needed help from bank loan (zombie-firm), shareholders or another company taking over Thomas Cook. Not willing to help. • £1.5 billion loss in May 2017, already in long-run • Cheaper and more effective to nationalise to rescue employees and suppliers Merger with MyTravel • Diseconomies of scale, LRAC > AR • Lack of synergy • Loss making business	

	Falling demand for Package holidays • AR shifting in • Booking online through competitors rather than Thomas Cook high street outlets • Package holiday inferior good, YED negative. • Climate change – stay at home. Opportunity cost Dependency Government lacks funds- budget deficit Moral hazard No consequences for the failings of management will teach other businesses who get into commercial difficulties that government will pick up the pieces NB: Case against subsidy may be seen as KAA and case for as evaluation or vice versa.	(4)
--	--	-----

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Indicative content	Mark
(e)	Knowledge 3, Application 3, Analysis 3 Exploiting market power • Jet2 increases 'price per person' by £36 after Thomas Cook closes (Fig 2) • Thomas Cook, with a 13% market share in 2019, exits the market causing Jet2 to gain market share, possibly close to 25% - gaining monopoly power/duopoly/oligopoly (Fig 1) • Jet2 may be using its monopoly dominance to set a price above the market clearing/allocatively market price • Consumer surplus reduced, producer surplus gained. • With less competition for package holidays, Jet2's PED becomes relatively more price-inelastic resulting in greater price setting powers for package holidays • Jet2 may now be able to set its price at a profit maximising level of £824 rather than possible sales maximisation/revenue pricing/limit pricing/predatory pricing at £788 • Demand for Jet2 holidays increasing as a close substitute to Thomas Cook • Remaining companies colluding, use of game theory. N.B KAA may be used as EV and vice-versa.	(9)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–3	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	4–6	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	7–9	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
(e) continued	Evaluation 6 Responding to market forces • Demand for Jet2 holidays increasing as a close substitute to Thomas Cook. This may have been happening before Thomas Cook closure • Thomas Cook exiting the package holiday may have removed a surplus of package holidays • At the price of £788 there is now a shortage of holidays to Sorrento, as shown by excess demand due to cancelled Thomas Cook holidays • Market forces resulting in Jet2 extending their supply at higher prices • As they increase the price to £824 the market may clear	(6)

	• Consumers may decide not to buy at higher price - to stay home or become anxious about firms closing and cancelled holidays • Other factors may have caused demand to rise or supply to shift inwards • Market share may not be reallocated to Jet2 • Jet2 is a distant substitute and may not go to same destinations as Thomas Cook • Companies do not collude as fear a whistle-blower and fines 10% of revenue • Rising marginal costs for Jet2 to reduce CO₂ emissions/ buy more fuel to new destinations/ costly take overs. NB KAA may be used as EV and vice-versa.	
--	---	--

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1-2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3-4	Evidence of evaluation of alternative approaches which is unbalanced. Evaluative comments with supporting evidence/reference to context and a partially-developed chain of reasoning.
Level 3	5-6	Evaluative comments supported by relevant chain of reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Q8.

Question Number	Answer	Mark
(a)	Knowledge 1, Application 1, Analysis 3 Knowledge/understanding: 1 mark for defining PPF - maximum possible production using available resources Application: 1 mark for reference to extract, e.g. 2.2 million Polish emigrants (1) Analysis: 1 mark for each of the following: - Draw PPF accurately (1) - PPF shifted inward marked on diagram (1) - Explanation of why PPF shifts inwards (1)	

Capital goods

Consumer goods

e.g. With people leaving Poland the labour force reduces in size meaning with available resources less consumer and capital goods can be produced (1).

(5)

Question Number	Indicative content	Mark
	Knowledge 2, Application 2, Analysis 2 - Understanding of geographical mobility of labour Factors that affect mobility of labour: - Benefit system- e.g. in UK funded by taxation - EU rules- Bulgarian/ Romanians allowed to move freely - Free access to Spanish doctor - Increases the incentive to move to the UK relative to other countries where benefits are contribution based making labour more mobile towards UK - Increases the number that are able to move between countries within the EU. Previously people in Bulgaria and Romania had to apply for a visa to move to the UK but now they can freely move to the UK. - If citizens move to Spain they have access to Spanish GPs and this will make moving to Spain more attractive and increase the mobility in to Spain.	(6)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no link between causes and consequences.
Level 2	3–4	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or the answer may lack balance.
Level 3	5–6	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are applied appropriately to the broad elements of the question.

Question Number	Indicative content	Mark
(b) continued	Evaluation 4 • Benefits are lower than rewards of work then it will have little impact on mobility of labour • Have to wait until permanent residents before receiving hospital treatment. • People are less likely to move regions for employment or different jobs as the safety net exists reducing the need to move for work and mobility • Magnitude- depends on size of benefits • Prioritisation- which factor might have the biggest impact on geographical mobility of labour	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/ reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Indicative content	Mark
(c)	Knowledge 2, Application 2, Analysis 4 Candidates may present benefits as Knowledge, Application and Analysis and problems as Evaluation or vice versa. Benefits • Bulgarian/ Romanian etc can provide labour where there are shortages • May attract students to UK who may remain and be productive in UK economy- particularly if skilled occupations • Added 2% to labour force- downward pressure on wages- firms able to employ more at lower costs • Migration, means it is easier to set up or continue here with access to the affordable skills they need. • The downward pressure on wages has helped lower unit labour costs and has made our exports relatively cheaper. • For firms in the UK there is now less regulation in recruiting much needed staff from Eastern Europe where shortages exist in the UK • Some sectors are also benefiting from skilled labour leading to rising productivity.	(8)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	3–5	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	6–8	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
(c) continued	Evaluation 4 • Magnitude “unprecedented expansion of labour supply” had contributed to stagnant wages. • Make it more difficult for unemployed people legally settled here to find a job • Little impact if benefits are more attractive to them • Magnitude- 1.1 million remain • Other factors may be to blame for stagnant wages- e.g. business confidence, recessions, financial crises, austerity measure.	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/ reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Indicative content	Mark
(d)	Knowledge 2, Application 2, Analysis 2, Evaluation 2 Knowledge/understanding: 2 marks for identification of likely reasons (1+1) Application: 2 marks for reference to the data (1+1) Analysis: 2 marks for linked explanation of these reasons (1+1) • To spread risk (1)- so that if one of the markets does less well (1) it will have less effect on the business (1) if profits falling in brickmaking (1), make money in cigarettes (1) • Asset stripping (1) the business may have bought one company (1) and kept all profitable aspects (1) and sold off unprofitable parts of business (1). So they may have continued mining minerals that were most profitable (1) and stopped mining others (1) • Economies of scale (1) by growing the business to benefit (1) from falling average costs (1) by owning a larger business that includes cigarettes, mining, toys and brickmaking they may be able to benefit from financial economies (1) as banks are willing to lend to the bigger company at lower rates of interest (1) Evaluation: 2 marks for two evaluative comments, e.g. • Likelihood of economies small as so diverse (1) • Only limited connection between businesses (1) OR 2 marks for identification and linked development e.g. • Asset stripping is likely to be the most likely reasons (1) as they have latterly started demerging and selling off aspects of the business that are less profitable.(1)	(8)

Question Number	Indicative content	Mark
(e)	Knowledge 3, Application 3, Analysis 3, Candidates may present positive impacts as Knowledge, Application and Analysis and negative impacts as Evaluation or vice versa. • Eliminating underperforming/ inefficient divisions making more efficient • More allocative efficiency- as less resources wasted on failing parts of the business • More productive efficiency- if diseconomies eliminated • More focused businesses- so less resources wasted on less profitable aspects • More finance available to grow more efficient aspects of business • Smaller units easier to control- perform better wasting less time in decision making • Workforces are shrinking. Philips employed 117 000 people at the end of 2013, down from more than 121 000 in 2008. Bayer reduced its staffing by 3 000 in 2013, while Siemens has 362,000 workers, a fifth fewer than in 2005- reduces over employment • Might lose economies of scale • Focusing on more profitable parts of business enables more profits to be made and invested. More innovation should allow for dynamic efficiency	(9)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–3	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	4–6	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	7–9	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
(e) continued	Evaluation 6 • Magnitude- the efficiency gains may be significant given the savings following redundancies • May only be short term trend more about the state of the economy and less about efficiency gains. • Measurement problem- how much efficiency gains will be achieved is difficult to measure • May reduce in size too far so that AC starts to rise.	(6)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/ reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evidence of evaluation of alternative approaches which is unbalanced. Evaluative comments with supporting evidence/reference to context and a partially-developed chain of reasoning.
Level 3	5–6	Evaluative comments supported by relevant chain of reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Q9.

Question Number	Answer	Mark
(a)	Knowledge 1, Application 1, Analysis 3 Knowledge/Understanding: 1 mark for: Understanding or definition of a concentration ratio (1) Application: 1 mark for reason e.g. Change in shopping habits which has led to consumers shopping more frequently in discount stores/online shopping from other retailers (1) OR The smaller discount stores such as Aldi and Lidl have increased their market share (1) Analysis: Award further marks for linked developments e.g. because Aldi and Lidl focus on low prices so their sales have risen faster than those of the big four (1) more convenient to shop at local stores (1) The four firm concentration ratio has decreased by 3.6 percentage points (2) OR Calculation of the four firm concentration ratio in 2010 ($30.8 + 17.6 + 16.1 + 11.6 = 76.1\%$) (1) Calculation of the four firm concentration ratio in 2015 ($28.6 + 16.5 + 16.5 + 10.9 = 72.5\%$) (1)	(5)

Question Number	Indicative content	Mark
(b)	Knowledge 2, Application 2, Analysis 4 • Definition of monopsony • Food prices likely to fall Effects on food suppliers might include: • Financial problems from delays in receiving payments from supermarkets (Extract A) • Lower prices mean a reduction in revenue and profits • Increased costs due to paying excessive amounts for packaging and promotions. • Losses may even be made • Pressure on suppliers to cut costs • Fall in employment • Some food suppliers may exit the industry • Less funds for investment • Risk that suppliers will reduce product quality • Figure 2 indicates some supermarkets abused their market power e.g. Tesco and Morrisons. Effects on consumers might include: • Lower prices mean higher consumer surplus • Impact on food waste • Impact of cost cutting measures on quality of food and consumer choice. NB for a Level 3 response, candidates must consider both food suppliers and consumers in their answer. Answers must refer to the context.	(8)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	3–5	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	6–8	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Answer	Mark
(b) continued	Evaluation 4 • Food suppliers may be able to increase efficiency and so remain profitable and stay in the industry. • Supermarkets may be reluctant to use their monopsony power for fear of GCA, government investigation and possible fines up to 1% of sales revenue. • Consumers may not benefit since supermarkets may not pass on lower costs in the form of lower prices. • Supermarket sector may not be a monopsony as there is more than one buyer –so perhaps less power over food suppliers. • According to Figure 2 some supermarkets may not abuse their position e.g. Aldi and Sainsbury. • Long term implications: exit of firms may risk supplies to consumers. • Consideration of bilateral monopoly e.g. large food supply firms or cooperatives. • Food suppliers may diversify e.g. farm shops. • Food suppliers may undertake vertical integration.	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/ reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Answer	Mark
(c)	Knowledge 2, Analysis 2, Application 2, Evaluation 2 Knowledge/understanding: 2 marks for identification of two measures (1+1) Analysis: 2 marks for linked explanation of these measures (1+1) Application: 2 marks for reference to data (1+1), e.g. • Fines - GCA can fine supermarkets up to 1% of annual revenue (1) • Regulation to ensure payments made within standard time (1) • Price regulation e.g. minimum pricing – to ensure fair prices are paid for supplies (1) /relevant diagram (1) • Promote new entrants and further competition in supermarket sector (1) • Block mergers if it leads to increased monopsony power (1) Evaluation: 2 marks for two evaluative comments, OR 2 marks for identification and linked development e.g. • Asymmetric information may lead to regulator making incorrect decisions (1) e.g. too lenient or too harsh on supermarkets (1) • Regulatory capture may arise (1) • Regulator may lack resources to investigate supermarket sector thoroughly (1) • Problems of gaining accurate information from suppliers (1) as they are reluctant to complain (1) • CMA may allow mergers (1) which increase monopsony power of supermarkets (1) • Government may counteract monopsony power by protecting farmers' income e.g. subsidies (1+1) • Problems of minimum price e.g. excess supply/food waste (1)	(8)

Question Number	Indicative content	Mark
(d)	Knowledge 2, Application 2, Analysis 2 • Identification of information gaps as a cause of market failure Information gaps as main cause of food waste e.g. • Food suppliers lack market information: e.g. predicting size of harvests – dependent on climate/ pest control and disease/ time lags in growing crops and raising livestock. • Supermarkets lack market information: e.g. predicting household demand – depends on tastes and fashion which may change/ population and migration changes/ impact of competitors. • Consumers lack market information: e.g. uncertainty over how to store food or whether food is fit for consumption after sell-by dates. Irrational behaviour as main cause of food waste e.g. • Computation issues e.g. consumers perceived demand may exceed actual demand for food / difficulty in comparing the different size of food products to fit with the actual amount of food required. • Habitual behaviour e.g. consumers may have a tendency to purchase more food than required/ better to have too much than too little food. • Influence of other people's behaviour e.g. consumers may purchase food that they might not want. • Impulse buying e.g. due to advertising or use of special offers. NB These points could count as Evaluation and the Evaluation points as KAA. NB A Level 3 response would typically consider both 'information gaps' and 'irrational behaviour'. NB There may be overlap between information gaps and irrational behaviour as possible causes of food waste.	(6)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no link between causes and consequences.
Level 2	3–4	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or the answer may lack balance.
Level 3	5–6	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are applied appropriately to the broad elements of the question.

Question Number	Indicative content	Mark
(d) continued	Evaluation 4 • Consideration of relative proportions of food waste e.g. supermarkets appear favourable compared to food suppliers and households. • Other factors could cause food waste e.g. ➢ Misleading advertising by firms so consumers purchase food they do not want. ➢ Transport and storage problems due to road congestion / problems of importing food from overseas. • Consideration of whether it is rational to assume that consumers seek to maximise utility in allocating their expenditure / and firms seek to maximise profits in making production decisions. • Long run information gaps may narrow and irrational behaviour may reduce e.g. improved labelling and social enterprise, advice to customers on how to store food and use leftovers or use of new technology to extend freshness of food. NB These points could count as KAA and the KAA as evaluation.	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.

Question Number	Answer	Mark
(e)	Knowledge 3, Application 3, Analysis 3 Problems of merger include: • CMA may block this horizontal merger since the combined firm has 27.4% market share/ exceeds the 25% legal monopoly figure. • Costs to the firms: possible diseconomies of scale such as overlap between location of stores/ co-ordination of staff/ redundancies/ implementation of new IT system (different types of diseconomies of scale may be awarded separately). • Impact of merger on consumer loyalty: the new store may not deliver consumer loyalty, for example, different brands between stores. • Lack of synergies and cultural clash • Underlying market conditions remain: consumers changing their shopping habits and merger does not address this issue. • Impact on food suppliers: increased monopsony pressure on suppliers may lead to reduced choice of food suppliers. An increased risk of GCA investigation. • Consideration of problems of other mergers and acquisitions: for example, BT takeover of EE. NB for a Level 3 response there must be reference to the context e.g. Figure 1 or Extract C.	(9)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–3	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	4–6	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	7–9	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
(e) continued	Evaluation 6 • There may be benefits which offset the problems, such as ◦ different types of economies of scale e.g. bulk purchase ◦ rationalisation of stores and employees could lead to increased efficiency and profitability ◦ increased market power • CMA could permit merger as sufficient competition still exists in the sector from online shopping and the growth of discount stores. • Prioritisation of problems with justification, for example, a lot of money could be spent on the proposed merger which is then blocked by CMA. • Short-run and long run implications: enormous upheaval in short run but sufficient cost savings could be made in long run to make it worthwhile.	(6)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evidence of evaluation of alternative approaches which is unbalanced. Evaluative comments with supporting evidence/reference to context and a partially-developed chain of reasoning.
Level 3	5–6	Evaluative comments supported by relevant chain of reasoning and appropriate reference to context. Evaluation recognises different viewpoints and/or is critical of the evidence.
