METHODS IN MATHEMATICS

UNIT 2: Methods (Calculator)

HIGHER TIER

A.M. TUESDAY, 17 June 2014

2 hours

ADDITIONAL MATERIALS

A calculator will be required for this paper.

INSTRUCTIONS TO CANDIDATES

Use black ink or black ball-point pen.

Write your name, centre number and candidate number in the spaces at the top of this page.

Answer **all** the questions in the spaces provided.

Take π as 3.14 or use the π button on your calculator.

INFORMATION FOR CANDIDATES

You should give details of your method of solution when appropriate.

Unless stated, diagrams are not drawn to scale.

Scale drawing solutions will not be acceptable where you are asked to calculate.

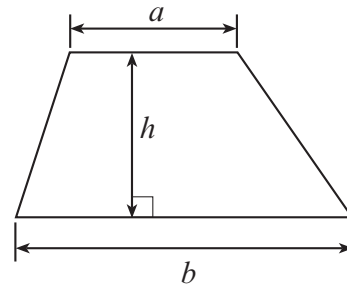

The number of marks is given in brackets at the end of each question or part-question.

You are reminded that assessment will take into account the quality of written communication (including mathematical communication) used in your answer to question 4.

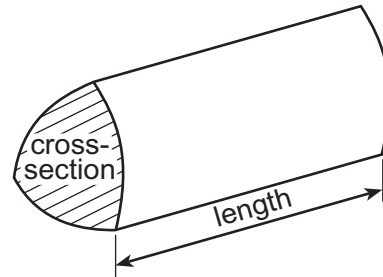

For Examiner's use only		
Question	Maximum Mark	Mark Awarded
1.	3	
2.	10	
3.	14	
4.	9	
5.	4

Formula List

Area of trapezium $= \frac{1}{2} (a + b)h$

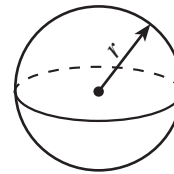

Volume of prism = area of cross-section $\times$ length

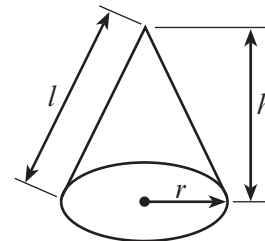

Volume of sphere $= \frac{4}{3} \pi r^3$

Surface area of sphere $= 4\pi r^2$

Volume of cone $= \frac{1}{3} \pi r^2 h$

Curved surface area of cone $= \pi r l$

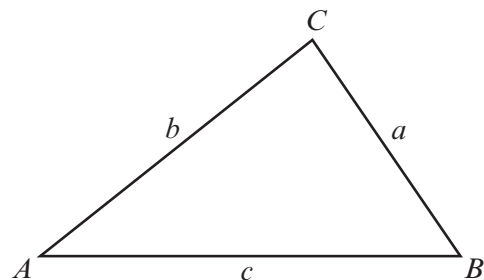

In any triangle ABC

Sine rule $\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C}$

Cosine rule $a^2 = b^2 + c^2 - 2bc \cos A$

Area of triangle $= \frac{1}{2} ab \sin C$

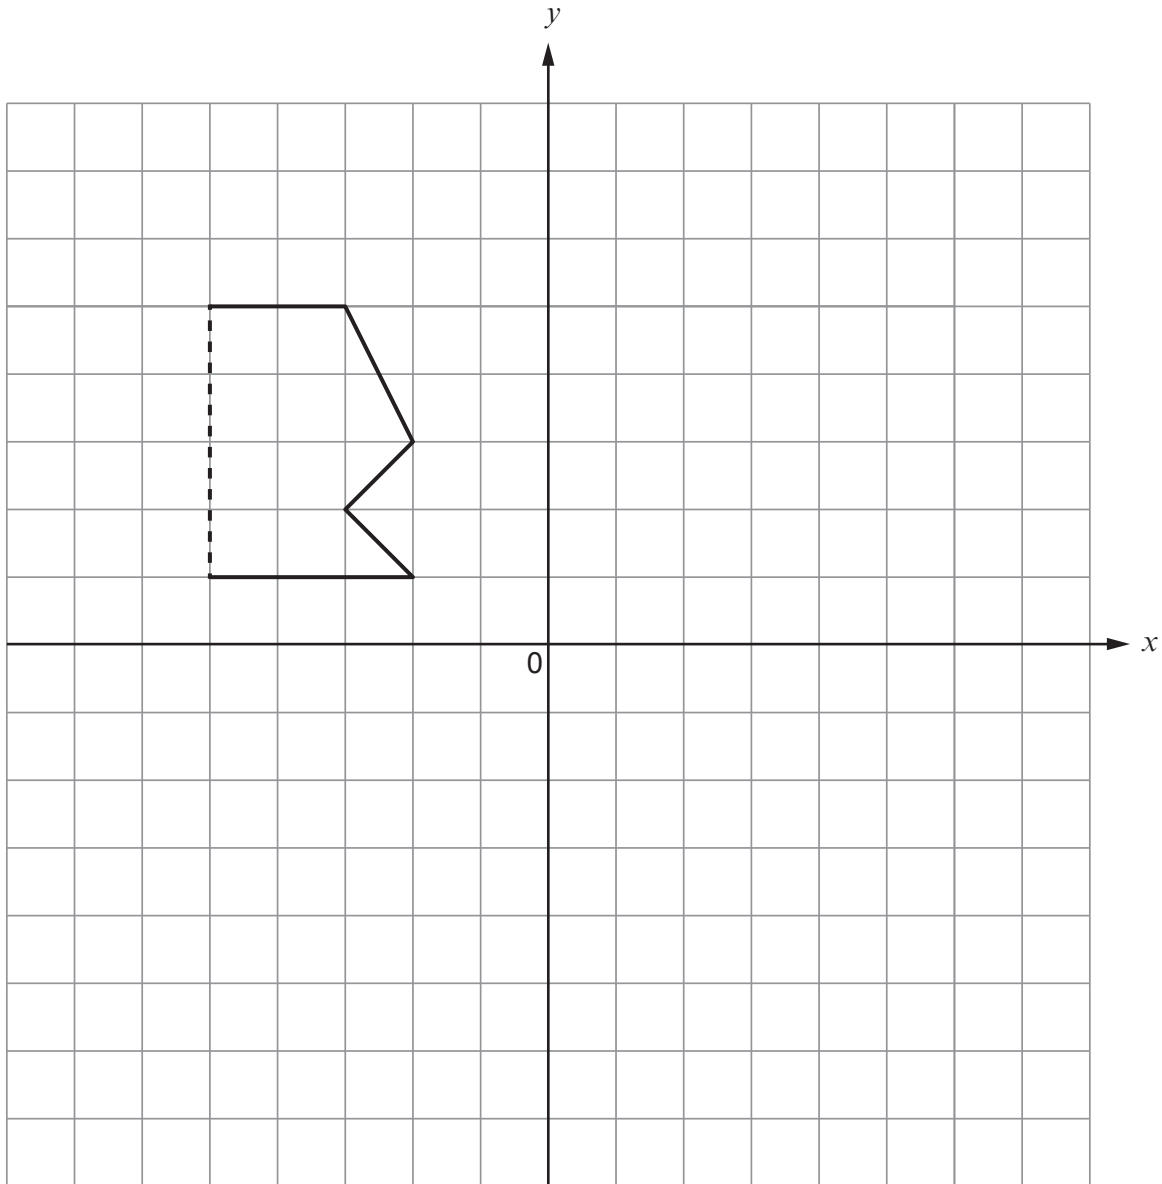

The Quadratic Equation

The solutions of $ax^2 + bx + c = 0$

where $a \neq 0$ are given by

$$x = \frac{-b \pm \sqrt{(b^2 - 4ac)}}{2a}$$

1. Part of a shape is shown on the grid. The dotted line is the line of symmetry of the shape. Complete the drawing of the shape and then rotate your complete shape through 180° about the origin. [3]

2. (a) Solve $\frac{5x}{8} = 10$.

[2]

.....

.....

(b) Solve $\frac{28}{x} = 7$.

[1]

.....

.....

(c) Solve $6(3x - 17) = 42$.

[3]

.....

.....

.....

.....

(d) Solve the inequality $9x + 5 < 77$.

[2]

.....

.....

.....

(e) Write down the greatest whole number that satisfies the inequality $5x < 85$.

[2]

.....

.....

.....

.....

.....

3. (a) What percentage is 34 of 6800?

[2]

.....

.....

- (b) Increase 34 000 by $2\frac{1}{4}\%$.

[2]

.....

.....

.....

- (c) Evaluate each of the following three lengths **correct to two significant figures**, and then arrange them in ascending order.
You must show all your working.

[5]

0.26 of 1345 metres

$\frac{3}{8}$ of 600 metres

4.5% of 3600 metres

.....

.....

.....

.....

.....
Smallest

.....
Largest

- (d) Calculate the difference between

- the smaller share when 450 is shared in the ratio 4:5
and
- $\frac{4}{5}$ of 450.

[5]

.....

.....

.....

.....

.....

.....

The length of a cuboid is $4e$ cm.
The width of the cuboid is $3e$ cm.
The height of the cuboid is $2e$ cm.
The total surface area of the 6 faces of the cuboid is 468 cm^2 .

- You must show all your working.

[9]

Volume of the cuboid = ...

4364
020007

- What was the difference in temperature between Monday and Friday?

[4]

6. It is known that a is proportional to b .
The table shows some values for a and b .

a	b
7.5	3
30	12
40	16

Use the information given in the table to complete the following equations.

[3]

$$a = \dots \times b$$

$$b = \dots \times a$$

.....

.....

.....

.....

7. Express each of the following numbers in standard form.

(a) 0.000056

[1]

.....

(b) 2300000000

[1]

.....

4364
020009

8. The diagram below shows a parallelogram.

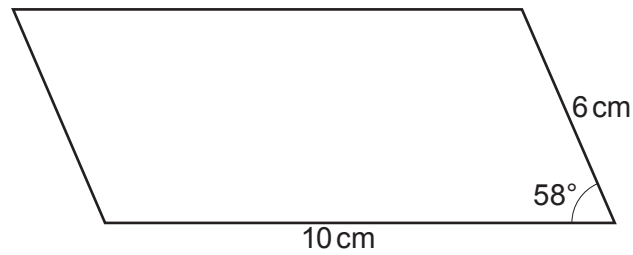

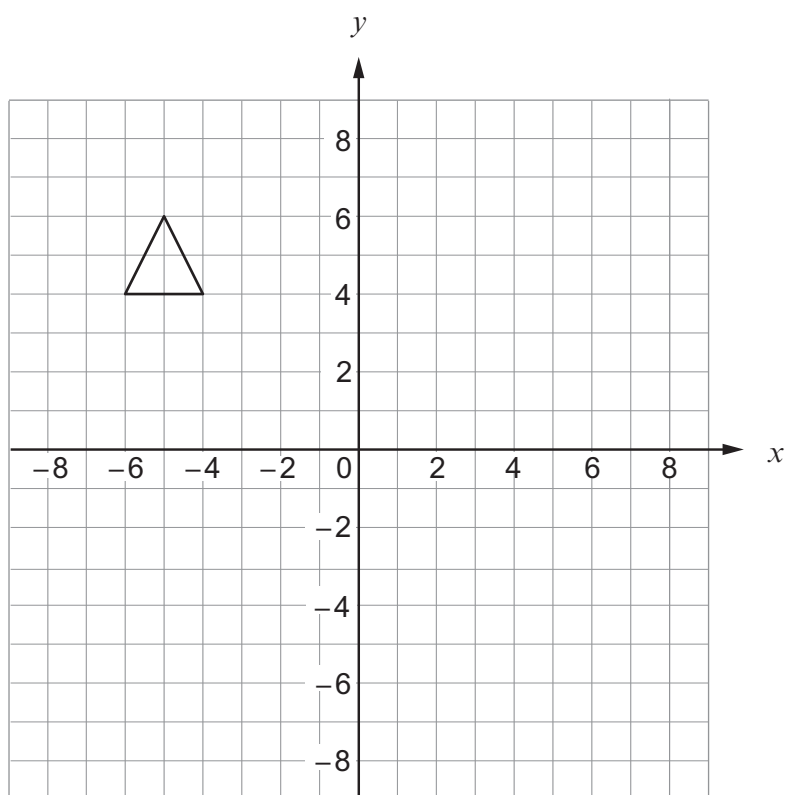

Diagram not drawn to scale

The area of the parallelogram is **not** 60 cm^2 .
Calculate the correct area of the parallelogram.
Give your answer to an appropriate degree of accuracy.

[6]

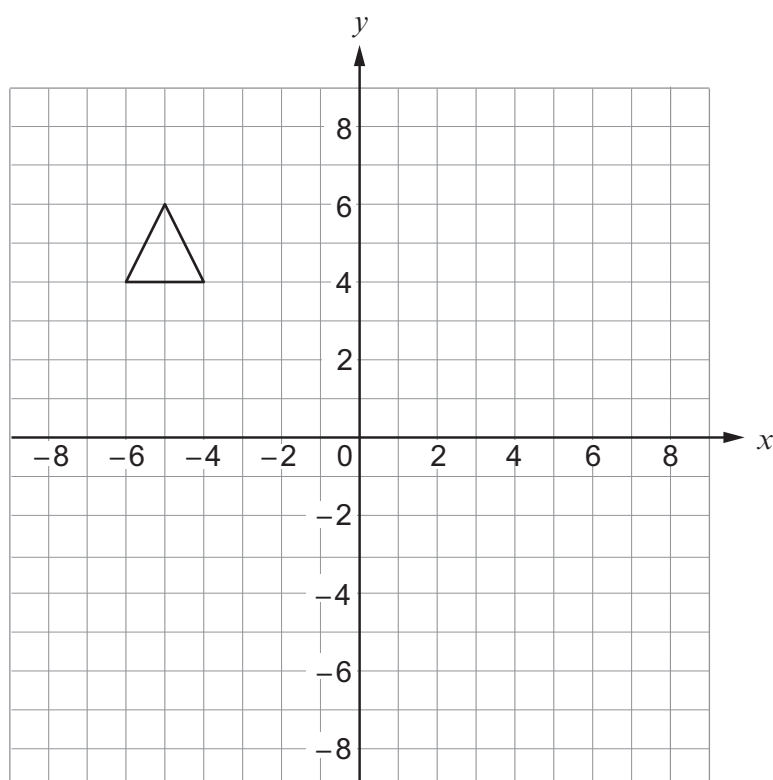

9. (a) Translate the triangle shown below by $\begin{pmatrix} 8 \\ -2 \end{pmatrix}$.

[1]

Examiner
only

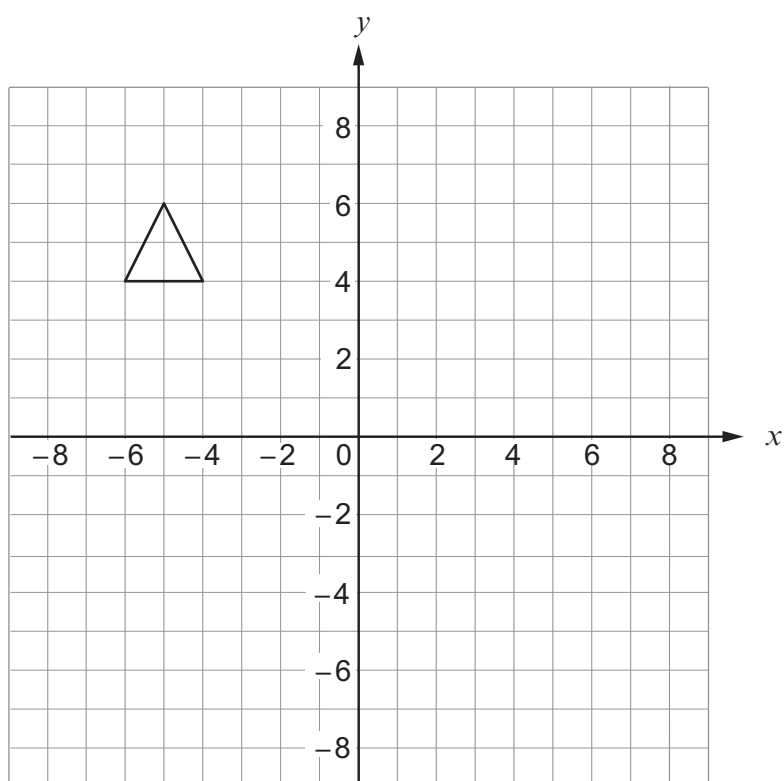

- (b) Rotate the triangle through 90° anticlockwise using the point $(-2, -1)$ as the centre of the rotation.

[2]

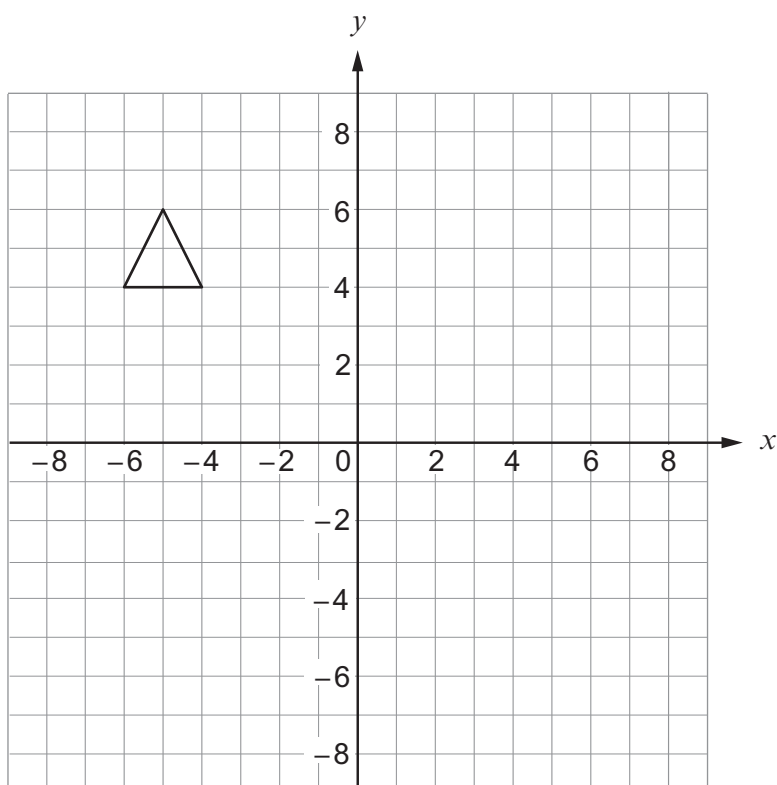

- (c) Reflect the triangle shown in the line $y = x$.

[2]

Examiner
only

- (d) Enlarge the triangle shown by a scale factor of $\frac{1}{2}$ using the origin as the centre of the enlargement.

[3]

Examiner
only

10. The diagram shows a circle with a diameter PT and a square with a diagonal RP . RT is a straight line with $RP = PT$.

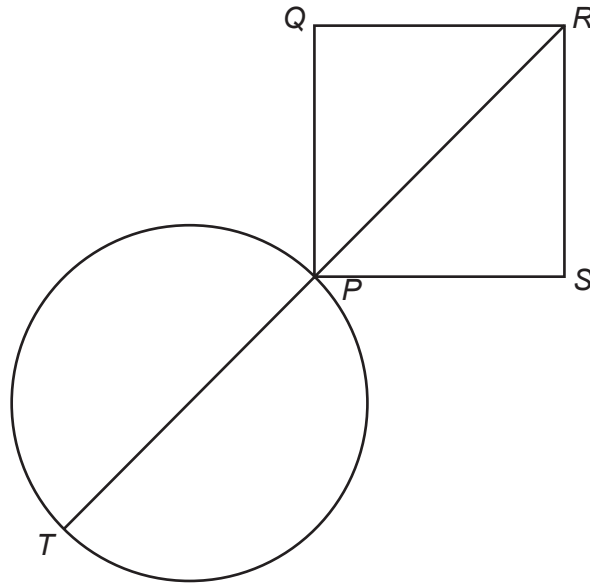

Diagram not drawn to scale

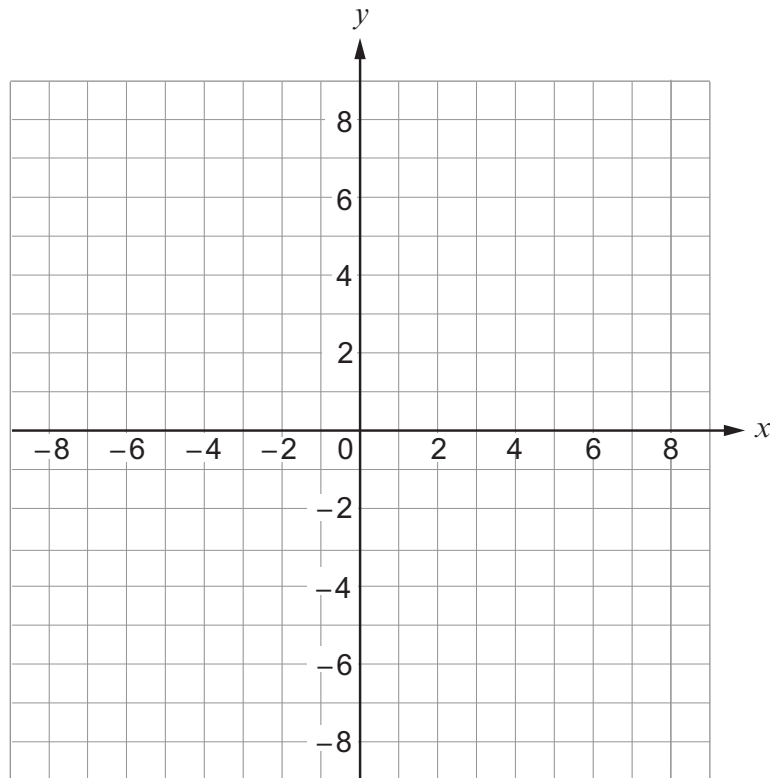

The circumference of the circle is 26.7 cm.
Calculate the perimeter of the square.

[6]

11. (a) A point moves such that it is equidistant from the x -axis and the y -axis.

(i) On the grid below, plot the locus of the point.

[2]

- (ii) Write down the equations that represent the locus of the point.

[2]

.....
 and

- (b) A point moves such that its distance from the origin is 3 units.
 Write down the equation that represents the locus of the point.

[1]

.....

12.

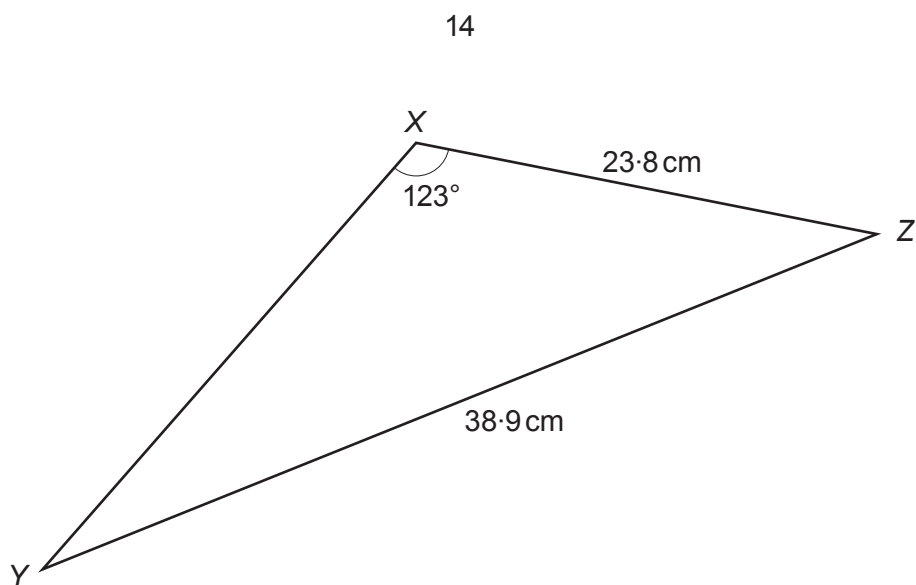

Diagram not drawn to scale

Calculate the size of $\hat{X}YZ$.

[3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

Examiner
only

13. Solve the following simultaneous equations using an algebraic method.

[6]

Examiner
only

$$\begin{aligned}2x^2 + xy - 5 &= 0 \\ x + y &= 4\end{aligned}$$

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

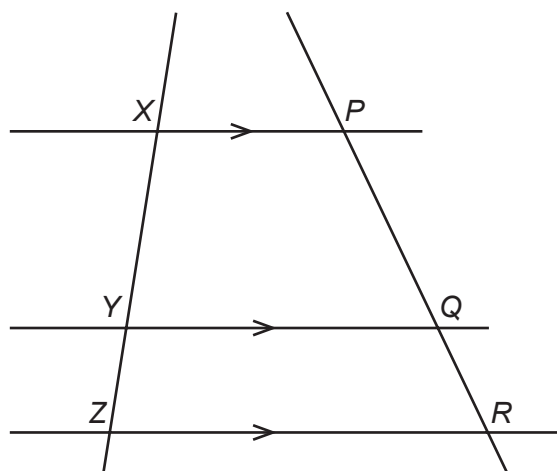

.....

.....

.....

.....

14. (a)

*Diagram not drawn to scale*

You are given that $XY = 6$ cm, $XZ = 8$ cm and $PQ = 7$ cm.
Calculate the length of QR .

[3]

.....

.....

.....

.....

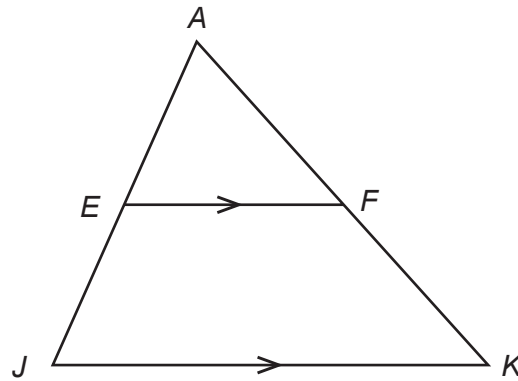

.....

.....

.....

.....

(b)

*Diagram not drawn to scale*

You are given that $AJ = 8x$ cm, $AK = 11y$ cm, $EF = 2x + 3y$ cm and that F is the mid-point of AK .

Find the perimeter of triangle AEF in terms of x and y .

Give your answer in its simplest form.

[3]

.....

.....

.....

.....

.....

.....

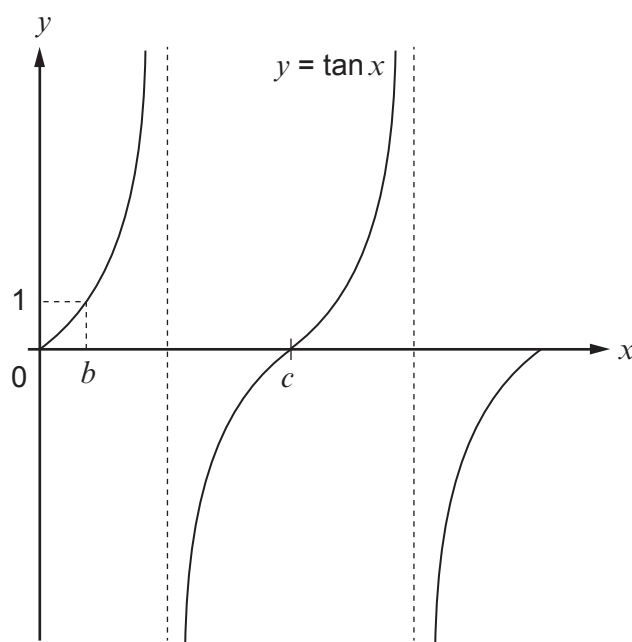

.....

.....

.....

.....

15.

A sketch of $y = \tan x$ is shown above.

Complete the following statements.

[2]

$$b = \dots\dots\dots^\circ$$

$$c = \dots\dots\dots^\circ$$

16. You are given that $\mathbf{HL} = 5\mathbf{x} + 6\mathbf{y}$, $\mathbf{LK} = 3\mathbf{x} - 6\mathbf{y}$ and $\mathbf{KN} = 18\mathbf{x} - 36\mathbf{y}$.

(a) Express $\mathbf{HK}$ in terms of $\mathbf{x}$ and $\mathbf{y}$ in its simplest form.

[2]

.....

.....

.....

.....

(b) (i) Show that $\mathbf{LN} = k\mathbf{LK}$ where the value of k is to be found.

[2]

.....

.....

.....

.....

.....

.....

(ii) What can you say about the points $\mathbf{L}$, $\mathbf{K}$ and $\mathbf{N}$?

[1]

.....

.....

Turn over for Question 17.

The image shows two three-dimensional shapes. On the left is a square pyramid, which has a square base and four triangular faces meeting at a single point (the apex). On the right is a cone, which has a circular base and a single curved surface that tapers to a point (the apex).

Square-based pyramid	Cone
It is a right pyramid. The total surface area of all 5 faces is 119.8 cm^2. The area of one triangular face is 23.6 cm^2. It has a volume of 76.4 cm^3.	It is a right cone. It has a volume of 44.4 cm^3.

$$\text{volume} = \frac{1}{3} \times \text{area of base} \times \text{perpendicular height.}$$

Calculate the radius of the cone.
