

GCSE MARKING SCHEME

SUMMER 2022

MATHEMATICS
UNIT 2 – FOUNDATION TIER

INTRODUCTION

This marking scheme was used by WJEC for the 2022 examination. It was finalised after detailed discussion at examiners' conferences by all the examiners involved in the assessment. The conference was held shortly after the paper was taken so that reference could be made to the full range of candidates' responses, with photocopied scripts forming the basis of discussion. The aim of the conference was to ensure that the marking scheme was interpreted and applied in the same way by all examiners.

It is hoped that this information will be of assistance to centres but it is recognised at the same time that, without the benefit of participation in the examiners' conference, teachers may have different views on certain matters of detail or interpretation.

WJEC regrets that it cannot enter into any discussion or correspondence about this marking scheme.

4.(b) 3	B1	
4.(c) 39	B1	
5.(a) 16 and 25	B2	Answer space takes precedence. Accept 4^2 and 5^2 . B1 for writing - two numbers with a difference of 9, one of which is square, or - two different square numbers in their answer space, or - listing at least three square numbers in their workings. If no marks, award SC1 for an unsupported answer of 4 and 5.
5.(b) No, AND correct reason stated e.g. (two odd numbers) add to give an even number (and 37 is odd). - only an even and an odd number can add to make 37. - only an even and an odd number can add to make an odd number.	E1	E0 if incorrect box is ticked, even if the correct reason is given. If none of the boxes are ticked, 'no' may be implied by their reason. Accept equivalent reasons. Accept the use of 'make' or 'and' instead of 'add'. Allow 'there are no two odd numbers which add to make 37' or 'the answer will always be even'. Exemplifying two odd numbers adding to an even number by itself is insufficient.
